OXFORD UNIVERSITY PRESS  
Oxford Auckland New York

# TABLE OF CONTENTS

List of figures	vii
List of tables	ix
List of plates	xi
Preface	xiii
List of contributors	xv

## Part One. Introduction

1 Clues to Australia's human past: pulling together the strands <i>Patrick McConvell &amp; Nicholas Evans</i>	1
2 Building on each other's myths: archaeology and linguistics in Australia <i>Sandra Bowdler</i>	17
3 Comparative linguistics and Australian prehistory <i>Harold Koch</i>	27
4 Genes, languages and landscapes in Australia <i>Neville White</i>	45

## Part Two. Perspectives from afar

5 On the correlation between linguistic and archaeological reconstructions <i>Ilia Peiros</i>	83
6 Language classification and models of the peopling of the Americas <i>Ruth Gruhn</i>	99
7 Dialect distribution and small group interaction in Greenlandic Eskimo <i>Michael Fortescue</i>	111
8 Prehistoric cultural explanations for widespread language families <i>Peter Bellwood</i>	123
9 Sprung from two common sources: Sahul as a linguistic area <i>Johanna Nichols</i>	135

## Part Three. Culture contact

10 Structural parallelism and convergence in the Princess Charlotte Bay languages <i>Bruce Rigsby</i>	169
11 The temporal interpretation of linguistic diversity in the Top End <i>Mark Harvey</i>	179
12 Comparative flora terminology of the central Northern Territory <i>David Nash</i>	187
13 Long lost relations: Pama-Nyungan and Northern kinship <i>Patrick McConvell</i>	207
14 Macassan loans and linguistic stratification in western Arnhem Land <i>Nicholas Evans</i>	237

**Part Four. Areal study and the Australian east coast**

- |    |  |     |
|----|--|-----|
| 15 | A continent of foragers: Aboriginal Australia as a 'regional system'                         | 261 |
|    | <i>Ian Keen</i>  |     |
| 16 | Chipping away at the past: a northern New South Wales perspective                            | 275 |
|    | <i>Terry Crowley</i>   |     |
| 17 | Little Big Men: alliance and schism in northeastern New South Wales during the late Holocene | 297 |
|    | <i>Luke Godwin</i>   |     |
| 18 | 'Worth a thousand words'? Words, images and material culture: a New England case study       | 311 |
|    | <i>Isabel McBryde</i>  |     |

**Part Five. The Pama-Nyungan enigma**

- |    |  |     |
|----|--|-----|
| 19 | Cognate search in the Pama-Nyungan language family   | 341 |
|    | <i>Geoff O'Grady &amp; Susan Fitzgerald</i>  |     |
| 20 | The distribution of large blades: evidence for recent changes in Aboriginal ceremonial exchange networks | 357 |
|    | <i>Harry Allen</i>   |     |
| 21 | Small tools and social change  | 377 |
|    | <i>Robert Layton</i>   |     |
| 22 | The cradle of the Pama-Nyungans: archaeological and linguistic speculations                              | 385 |
|    | <i>Nicholas Evans &amp; Rhys Jones</i>   |     |

- |   |     |
|---|-----|
| Appendix. Alternative language and ethnic names | 419 |
| Combined bibliography                           | 423 |
| Index   | 455 |

## LIST OF FIGURES

3.1	Tree diagram of genetic relations between languages.	29
3.2	Areal distribution of linguistic features in Arandic.	38
4.1	The degree of skin pigmentation plotted against the single recessive gene trait, phenylthiocarbamide (PTC) non-taster phenotype, for five Northern Territory tribes.	48
4.2	Summary of an analysis of variance (ANOVA) with unequal sample sizes based on total ridge-counts.	50
4.3	Population genetic affinities for thirteen Aboriginal groups, including a large sample of Yolngu.	61–64
4.4	An interpretation of the relationship between tribal environments, endogamy rates and genetic diversity in Arnhem Land and Central Australia.	73
5.1	Two major types of relationship between technological repertoire, material culture complex, community and language.	89
5.2	Classification of the Lolo-Burmese family given by lexicostatistics.	93
7.1	Reconstructed demographic spread of the Eskimo population just prior to contact times.	113
7.2	Distribution of the modern Greenland dialects.	115
7.3	Successive Inuit movements into and down through Greenland.	117
7.4	Climatic variations correlated with a particular oxygen isotope's percentage in ice core samples from Greenland's inland ice.	119
8.1	Agricultural heartlands of the Old World and Sahul.	128
8.2	Presumed homeland regions for the major Old World language families which are believed to have begun their expansions within agricultural heartlands.	129
9.1	Sample languages of Australia and New Guinea.	139
9.2	Distribution of head/dependent marking traits.	143
9.3	Languages with ergative alignment.	144
9.4	Distribution of passive and causative traits.	146
9.5	Languages of high complexity (eleven or more head/dependent marking points).	147
9.6	Languages with adpositional phrases.	149
9.7	Languages with an inclusive/exclusive opposition.	150
9.8	Languages with simple and elaborate noun class systems.	152
9.9	Languages with numeral classifiers.	153
9.10	Languages lacking singular/plural neutralisation (that is, with a singular/plural distinction in all parts of speech).	154
9.11	Distribution of minimal and complex tone systems.	156
9.12	Languages with only one distinctive series of stop articulation.	158
9.13	Old Sahul features.	161
9.14	Circum-Pacific features.	162
11.1	Languages of the Top End.	180
12.1	Schematic map of central Northern Territory with relative location of languages.	189

12.2	Example of combined stratigraphy.	200
13.1	Map of sections and subsections in northern and central Australia.	209
13.2	The origin of subsections.	211
13.3	Linguistic stratigraphy and the diffusion of subsections.	214
13.4	Ngumpin-Yapa languages and Northern neighbours.	220
13.5	Distribution of the * <b>kamin(ny)</b> etymon.	224
13.6	Distribution of the * <b>ngaji</b> etymon.	225
13.7	Distribution of the * <b>jam(p)a(ny)</b> etymon.	226
13.8	Distribution of the * <b>ka(ng)ka/u(l)</b> etymon.	228
13.9	Distribution of the * <b>ngapuju</b> etymon.	229
13.10	Distribution of the * <b>jaja/u</b> etymon.	230
14.1	Arnhem Land languages with Macassan loans.	238
14.2	The Iwaidjan languages.	239
14.3	Family tree model of non-Pama-Nyungan languages in Arnhem Land.	240
14.4	The Iwaidjan languages and possible entry points for loans.	241
14.5	Relative chronology of sound changes in the Iwaidjic languages.	250
16.1	Northern New South Wales.	282
16.2	Languages of northern New South Wales, showing percentage of cognate sharing with neighbours.	288
16.3	Settlement patterns for northern New South Wales.	290
17.1	Study area showing the location of major towns and rivers in northeastern New South Wales.	298
17.2	Approximate locations and boundaries of linguistic groups in northeastern New South Wales.	299
17.3	Approximate distribution of axes from five major sources in northeastern New South Wales.	301
17.4	Relationship of languages in northeastern New South Wales.	303
18.1	The Clarence and Richmond valleys, showing centres of European settlement in the nineteenth century.	312
19.1	Approximate locations of languages in the Australian phylum.	342
20.1	Large blades and the method of hafting them used in northern Australia.	358
20.2	Small points from Ngarradj Warde Djobkeng, Kakadu, Northern Territory.	364
20.3	The archaeological distribution of small unifacial and bifacial points.	365
20.4	The ethnographic and known archaeological distribution of large blades.	368
21.1	Australian geometric rock art traditions.	382
22.1	Language families of Australia.	386
22.2	Genetic relationships of the Mindi languages, as proposed by Chadwick.	391
22.3	Proposed steps in the emergence of proto-Pama-Nyungan.	393
22.4	Examples of Pama-Nyungan implement terms.	404–406
22.5	Australian small tools.	408

## LIST OF TABLES

3.1	Warluwarric cognates.	30
3.2	Cognates in Warlpiri and Kaytetye.	32
3.3	Kaytetye loanwords from Warlpiri; and Warlpiri loanwords from Kaytetye.	34
3.4	Possible interpretations of Warlpiri-Kaytetye correspondences in loanwords.	35
3.5	Kaytetye loanwords from Warlpiri with truncated initial consonants.	35
4.1	Genetic distances based on various gene markers for four Arnhem Land populations.	55
4.2	Haplotype and gene frequency data for the Yolngu compared with twelve other Aboriginal populations from northern and central Australia.	60
5.1	Correlation between technological repertoire and proto-lexicon.	90
9.1	Head/dependent marking in New Guinea and Australia.	142
9.2	Alignment marking in New Guinea and Australia.	142
9.3	Correlation between ergativity and head/dependent marking in New Guinea and Australia.	144
9.4	Passive/causative ratio in New Guinea, in Australia and worldwide.	145
9.5	Complexity in the languages of New Guinea and Australia.	147
9.6	Languages with adpositional phrases versus languages with no phrasal constituent in this function.	148
9.7	Languages with adpositional phrases or noun phrases versus languages known or presumed to have none.	148
9.8	Inclusive/exclusive pronouns in New Guinea and Australia.	150
9.9	Noun classes in New Guinea and Australia.	151
9.10	Numeral classifiers in New Guinea.	153
9.11	Singular/plural neutralisation in New Guinea and Australia.	154
9.12	Tone systems of all kinds in New Guinea.	155
9.13	Frequency of complex tone systems in New Guinea.	155
9.14	Number of distinctive series of stop articulations in New Guinea and Australia.	157
9.15	Summary of patterns in New Guinea and Australia.	159
9.16	Worldwide areal frequencies or means for ten linguistic markers.	163
10.1	Nominative pronouns in some languages of the Princess Charlotte Bay and nearby regions.	175
12.1	Central Northern Territory language names, abbreviations and documentary sources.	190
12.2	Plants occurring in both Arnhem Land and central Australia: non-use as food plants in a region, and records of vocabulary or cross-references to correspondence sets.	202–203
13.1	Languages in northern and central Australia: map references and sources of kin term data.	208
13.2	Kinship terms in Ngumpin-Yapa, in some non-Pama-Nyungan neighbours, and in proto-Ngumpin-Yapa.	218–219
14.1	Stratification of the hypothetical loanword <b>lapa</b> in the Iwaidjic languages.	251

14.2	Examples of late loans into Iwaidjan languages from Macassan languages and from other Australian languages.	252–253
18.1	Lexical data for material culture in Clarence region word lists.	322–329
18.2	Material culture in the photographic images made by J.W. Lindt at Grafton <i>circa</i> 1872–1875.	339
19.1	List of abbreviations for language names.	343
19.2	Some language families within the Australian phylum.	344
20.1	Archaeological sites in central Australia and the Western Desert region.	370
22.1	Comparison of Northern and Pama-Nyungan pronoun sets.	390
22.2	Some wooden implement terms.	398–402
22.3	Stone implement terms.	407

## LIST OF PLATES

18.1	Aboriginal people of the Richmond/Clarence in the 1870s.	313
18.2	Outdoor study by J.W. Lindt made near Grafton in the early 1870s.	314
18.3	An Aboriginal group preparing for a corroboree—taken by J.W. Lindt near Grafton in the early 1870s.	335
18.4	Four studio studies of Clarence Aborigines taken in Grafton by J.W. Lindt, showing the range of material culture.	336
