

CONTENTS

Foreword.....	xiii
Jefferson Fox	
Preface	xvii
Malcolm Cairns	
Quick geographic reference for the book's chapters	xxvi

1. Introduction

A. Overview chapters: The context in which this book was prepared

(i) A backwards glance, over our shoulders ...

1. The view of swidden agriculture by the early naturalists Linnaeus and Wallace.....	3
Michael R. Dove	
2. Shifting cultivators and the landscape: An essay through time.....	25
Harold Brookfield	
3. Swiddens and fallows: Reflections on the global and local values of 'slash and burn'	62
Carol J. Pierce Colfer, Janis B. Alcorn and Diane Russell	
4. Agroforestry pathways revisited: Voices from the past.....	87
John Raintree and Katherine Warner	
5. Shifting agriculture and its changes in Yunnan Province, China	122
Shaoting Yin	
6. Swiddeners at the end of the frontier: Fifty years of globalization in Northern Thailand, 1963–2013	134
Peter Kunstadter	

(ii) Looking towards the future ...

7. The future of swidden cultivation	179
Joseph A. Weinstock	

8. Shifting agriculture and fallow management options:
Where do we stand?186
P. S. Ramakrishnan
9. *Chena* cultivation in Sri Lanka: Prospects for agroforestry interventions199
Herath P. M. Gunasena and D. K. N. G. Pushpakumara
10. Learning from migratory agriculture around the world to improve both
swidden and modern agriculture in Southeast Asia221
Roland Bunch
11. Learning to cope with rapid change: Evergreen agriculture transformations
and insights between Africa and Asia..... 235
Dennis P. Garrity

2. Is shifting cultivation really the 'bogeyman' of climate change and biodiversity loss?

A. Shifting cultivation in an era of climate change

12. Swidden transitions in an era of climate-change debate.....261
Meine van Noordwijk, Peter A. Minang and Kurniatun Hairiah
13. Climate change: Adaptation, mitigation and transformations of
swidden landscapes: Are we throwing the baby out with
the bathwater?281
Kamal Aryal and Dhrupad Choudhury
14. Best REDD scenario: Reducing climate change in alliance with swidden
communities and indigenous peoples in Southeast Asia 289
Janis B. Alcorn and Antoinette G. Royo
15. Earning carbon credits through fallow management on lands affected
by shifting cultivation in northeast India307
Imtienla Ao
16. Formal and indigenous forest-management systems in
Central Vietnam: Implications and challenges for REDD+ 319
Mucahid Mustafa Bayrak, Tran Nam Tu and Paul Burgers
17. Changing strategies of shifting cultivators to match a changing climate 335
Prasert Trakansuphakon
18. Fallows and flooding: A case study on the potential contribution of
fallows to flood mitigation357
Peter D. Suson, Rex Victor O. Cruz, Ruth P. Serquina,
Nathaniel C. Bantayan, Daisy Lou L. Polestico and Jerson N. Orejudos

19. Dynamics of an island agroecosystem: Where to now?.....	367
Marjorie V. Cushing Falanruw and Francis Ruegorong	
B. Is shifting cultivation friend or foe to biodiversity?	
20. Second thoughts on secondary forests: Can swidden cultivation be compatible with conservation?	388
Dietrich Schmidt-Vogt	
21. Biodiversity and swidden agroecosystems: An analysis and some implications	401
Percy E. Sajise	
22. Shifting cultivators, curators of forests and conservators of biodiversity: The Dayak of East Kalimantan, Indonesia.....	420
Herwasono Soedjito	
23. Fallow-management practices among the Tangkhuls of Manipur: Safeguarding provisioning and regulatory services from shifting-cultivation fallows	449
L. Jitendro Singh and Dhrupad Choudhury	
24. Some lesser known facts about <i>jhum</i> in Nagaland, northeast India.....	468
Temjen Toy and POU (Project Operations Unit) Members	
25. Plant genetic diversity in farming systems and poverty alleviation in Vietnam's northern mountain region	473
Tran Duc Vien, Vu Van Liet and Nguyen Thanh Lam	
26. Experimenting with change: Shifting beliefs and rice varieties in swidden communities in northern Laos	491
Karen McAllister	
27. Is the 'bogeyman' real? Shifting cultivation and the forests, Papua New Guinea	517
Bryant Allen and Colin Filer	
28. The end of swidden in Bhutan: Implications for forest cover and biodiversity.....	546
Stephen F Siebert, Jill M. Belsky, Sangay Wangchuk and James Riddering	
29. Valuation and management of forest ecosystem services: A skill well exercised by the forest people of Upper Nam Theun, Lao PDR	559
Laurent Chazée	
30. <i>Benuaron</i> : The fruit gardens of the Orang Rimba.....	577
Bambang Hariyadi and Dedi Harmoko	

31. Ancestral domain and national park protection: A logical union? A case study of the Mt Kitanglad Range Nature Park, Bukidnon, Philippines597
Malcolm Cairns
32. Shifting cultivation and wildlife sanctuaries in ancestral domains: Friend or Foe of biodiversity conservation?..... 635
Gliceto 'Butch' O. Dagondon and Maria Easterluna Luz S. Canoy
33. The missing link of forest regeneration: Dwindling shifting cultivation in India's Northwestern Ghats..... 653
Archana Godbole, Jayant Sarnaik and Yogita Gokhale
34. Fallows and forest restoration 662
Kuswata Kartawinata and Rochadi Abdulhadi
35. Characteristics and roles of fallow and riparian forests in a mountainous region of northern Laos..... 682
Isao Hirota
36. A plant-resources survey and festival: A community-based approach to biodiversity education and conservation 694
Venancio A. Acebedo, Lorna F. Acebedo and David M. Bates
37. Developing information systems on indigenous plant resources in the Cordillera Administrative Region, Philippines..... 708
Damasa B. Magcale-Macandog, Edwin R. Abucay, Lorenza G. Lirio, Lito O. Ayyokad, Joyce N. Paing, Jovita E. Saguibo, Enesto T. Miguel and Marlyn Tombali

3. Specialization for markets or continued agrodiversity for subsistence?

A. When swidden fallows become the domain of commodity crops

38. Oil palm as a productive fallow? Swidden change and new opportunities in smallholder land management.....731
Ole Mertz
39. Where are the swidden fallows now? An overview of oil-palm and Dayak agriculture across Kalimantan, with case studies from Sanggau, in West Kalimantan742
Lesley Potter
40. Busy people, idle land: The changing roles of swidden fallows in Sarawak.....770
Rob Cramb

41. Socially constructed rubber plantations in the swidden landscape of southwest China	794
Jianchu Xu and Zhuangfang Yi	
42. Rubber plantation, swidden agriculture and indigenous knowledge: A case study of a Bulang village in Xishuangbanna, China	811
Lun Yin, Dayuan Xue and Jing Wang	
43. Impacts of smallholder rubber on shifting cultivation and rural livelihoods in northern Laos.....	826
Vongpaphane Manivong and Rob Cramb	
44. From subsistence swidden fallows to market-oriented monoculture production: Drivers of land-use change in the Lao PDR, in the context of market globalization	841
Paulo Pasicolan and Thatheva Saphangthong	
45. Transformation of a landscape: Shifting cultivation, biodiversity and Tea	850
Janet C. Sturgeon	
B. Shifting cultivation on an island frontier: An examination of the main swidden communities in Palawan, the Philippines – Sub-edited by James F. Eder	
46. Tree crops, fallow management and agricultural settlement in the Cuyonon system of shifting cultivation	861
James F. Eder	
47. Governmental pressures on swidden landscapes on Palawan Island, the Philippines	877
Wolfram Dressler	
48. Rice-related knowledge, farming strategies and the transformation of swiddens among the Batak of Palawan Island, the Philippines.....	891
Dario Novellino	

4. Concluding section:

49. Gender analysis: Shifting cultivation and indigenous people	920
Carol J. Pierce Colfer, Rebakah Daro Minarchek, Malcolm Cairns, Anungla Aier, Amity Doolittle, Valerie Mashman, Helen Hambly Odame, Michelle Roberts, Kathryn Robinson and Penny Van Esterik	
50. The Bidayuh of Sarawak: Gender, spirituality and swiddens	958
Valerie Mashman and Patricia Nayoi	

51. Cartoons about shifting cultivation: Using humour to emphasize some important points	972
Malcolm Cairns	
52. Afterword: Swidden agriculture in retrospect	995
A. Terry Rambo
