Introduction  Section One: Pragmatics and Practicalities of CAA  1. Pragmatic issues when integrating technology into the assessment of students Jen Harvey and Nora Mogey  2. Technical and security issues Dave Whittington  3. Effective question design Norma Pritchett  4. Automated online tutorials: new formats for assessment on the WWW Alan J Cann and Ellen L Pawley  5. Computer anxiety in students: should computer-based assessment be used at all? Mark Brosnan  6. Validating formative and summative assessment Malcolm Perkin  7. Open-access randomly generated tests: assessment to drive learning M Thelwall  8. Automatic test generation from a database J H Sims Williams, J Maher, D Spencer, M D J Barry and E Board  Section Two: Using CAA for Formative Assessment	Note	s on Contributors	ix

## viii Contents

10.	Computer-assisted peer review  Jennifer M Robinson	95		
11.	Increasing learner responsibility and support with the aid of adaptive formative assessment using QM designer software Christine Steven and Ian Hesketh	103		
12.	Computer managed learning as an aid to formative assessment in higher education  Leith Sly and Léonie J Rennie	113		
Section Three: Learning from Experience				
13.	Optical mark reading (OMR) as CAA: experiences at Loughborough University  Myles Danson	121		
14.	The computer-assisted assessment of practical IT skills <i>R D Dowsing</i>	131		
15.	Assessment in a cognitive apprenticeship-based learning environment: potential and pitfalls A Patel, D Russell and Kinshuk	139		
16.	Online assessment: creating communities and opportunities Meg O'Reilly and Chris Morgan	149		
17.	Delivering automated innovative assessment in a varied curriculum $Roy\ Seden$	163		
18.	A structured approach to mass implementation of computer-based assessment (CBA) Stan Zakrzewski	171		
19.	Student perceptions of the learning benefits of computer-assisted assessment: a case study in electronic engineering Kay Sambell, Alistair Sambell and Graham Sexton	179		
Conclusion: a glimpse of the future		193
