

Contents

<i>Preface</i>	xi
<i>Introduction</i>	xv
What Children Know and We Have Already Forgotten About Writing and Numerals	
Defining a Domain of Knowledge	xvii
A Developmental Domain-Specific Perspective on Writing and Numerals	xxiii
A Constructivist Perspective on Writing and Numerals	xxv
Private and Public Aspects of Writing and Numbers	xxvii
Literate Adults' Ideas About the Development of Writing	xxviii
Outline of the Book	xxx
1 What Philosophers Say About Representational Means That May Help Us to Understand What Makes Writing and Numerals so Special	1
The Confines of Semiotics	5
External and Internal Representations	6
	v

Aside on Two Examples to Clarify Different Types of Representation	9
Conditions of External Representations	11
Dimensions for Distinguishing Pictorial and Scriptorial Devices	12
The Notion of Notation	15
Conditions Met by Notational Elements	16
Context Sensitivity Revisited	19
2 What Historians Say About the Origin and History of Writing and Numerals	21
Prototypical Accounts of the History of Writing	26
Aside on The Projection Principle	28
The Seed(s) of Writing	29
Aside on the Metalinguistic Reflection and Writing	32
Principles in Historical Notation of Number	34
The Grouping Principle	35
Operational Principles	37
The Positional Principle	37
Notational Principles and Notational Forms	38
The Use of Notational Elements for Representing Absence	39
Some Conclusions About the Historical Principles of Number Notation	40
Principles in the History of Writing	41
The Case of Proper Names	42
The Case of Multilingual Cuneiform	44
Aside on Types of Language	45
The Case of the Phoenician Letters	48
The Case of Romance Latin	50
Some Conclusions From the Historical Case Analyses	50

3 What Children Know About Writing Before Being Formally Taught to Write	53
The Child's Path to Alphabetic Writing	55
Writing to Write	56
Writing Becomes Formally Constrained	62
Constraints on Legibility	62
Constraints on "Writability"	65
Writing Becomes Communicative	69
Links Between Reading and Writing	71
Writing Becomes Regulated by Letter-to-Sound Correspondences	74
The Syllabic Hypothesis	76
Writing Becomes Language Specific	78
The Alphabetic Principle	84
The Development of Early Writing and Invented Spelling	89
The Development of Early Writing and Sociocultural Approaches to Literacy	92
Writing as a Source of Knowledge	94
4 What Children Know About Numerals Before Being Formally Taught and Immediately Afterward	97
Notional Cognition and Notational Cognition	98
Numerical Notions Before Notations	103
Cognition of Environmental Notations	109
Interpreting and Relating Digital and Analogical Representations	115
Creating Graphic Representations of Quantity	117
Inventing Numerical Notations	121
Understanding Combinations of Numerals	125
Children's Path to the Written System of Numeration	128

Criterion 1: The Number of Numerals is a Good Indicator of Magnitude	129
Criterion 2: The Position of Numerals is Also Important: The One Coming First Wins	130
Criterion 3: Round Numbers Receive a Privileged Treatment	131
Criterion 4: Conflict Between Magnitude and Number of Numerals	133
Aside on Spoken and Written Numeration	134
The Representation of Absence and the Use of Zero	137
Numerals as a Source of Knowledge	139
5 What Children Know About the Relations Between Writing and Number Notation	145
Similarities and Differences Between Alphabetic Writing and Numerals	147
The Child's View of Writing and Numerals Before Schooling	151
Formal Differentiation Between Writing and Numerals	152
Functional Differentiation Between Writing and Numerals	157
Explicit Differentiation Between Writing and Numerals	166
Differentiation Without Schooling	175
Sources of Early Differentiation	177
So Where Does Early Differentiation Originate?	180
New Writing Spaces or Redefining Relations Between Notations	181
6 The Effect of Writing on Children and Grown-ups Once It Has Been Learned	184
Aside on Writing and Language	186
The Effects of Writing on Language	188
Phonological Awareness	188

In What Ways Did the Two Languages Differ?	191
Morphological Awareness	193
Judgments of Grammaticality	194
Conceptualization of Words	196
The Effect of Writing on Life	200
Valentin Jamerey-Duval: Acquiring Technology and the Prevailing Ideology	201
Writing in the Life of Domenicho Scandella: Incorporating Technology Into One's Own Ideology	203
Writing in the Life of Latifa: Writing as Alienation	205
Writing on Writing	207
7 Closing Reflections on Notational Systems, Boomerangs, and Circles	213
The Boomerang Effect on the Development of Writing and Numerals	215
The Boomerang Effect on Users' Ideas of the Domains of Knowledge Represented by Notations	219
The Boomerang Effect on the History of Notational Systems	221
The Boomerang Effect in the Relations Between Biology and Culture	222
Looking Forward and Appreciating What Has Been Learned	223
<i>References</i>	227
<i>Glossary</i>	241
<i>Author Index</i>	247
<i>Subject Index</i>	253
