1 <i>Introduction: on the structural analysis of social mobility</i>	I
Ronald L. Breiger	

Part I *Contexts and careers*

2 <i>Mobility as control: congressmen through committees</i>	27
John F. Padgett	
3 <i>Recruitment and selection processes: the organizational side of job searches</i>	59
Peter V. Marsden and Karen E. Campbell	
4 <i>Vacancy models for historical data</i>	80
Andrew Abbott	
5 <i>What is the true rate of social mobility?</i>	103
Christopher Jencks	

Part II *Beyond occupation: mobility in heterogeneous environments*

6 <i>The structure of organizational careers</i>	133
Karen N. Gaertner	
7 <i>Structure as an environmental property: industry demographics and labor market practices</i>	155
Jack W. Brittain and Douglas R. Wholey	

8	<i>The sex segregation of occupations as a circulating system</i>	183
	Jerry A. Jacobs	
9	<i>Measuring occupational stratification using log-linear distance models</i>	208
	Joel H. Levine	
10	<i>Intermediate classes and social structure</i>	225
	Ronald L. Breiger	

Part III *Bringing individuals back in*

11	<i>Social resources and social mobility: a structural theory of status attainment</i>	247
	Nan Lin	
12	<i>Structural models of organizational careers: a critical review and new directions</i>	272
	James E. Rosenbaum	
13	<i>Identifying career lines and internal labor markets within firms: a study in the interrelationships of theory and methods</i>	308
	Robert P. Althauser and Arne L. Kalleberg	
	<i>Author index</i>	357
	<i>Subject index</i>	362

Figures, maps, and tables

Figures

3.1 Predicted differences in recruitment methods for two plants	page 73
5.1 Conceptions of equal opportunity	124
6.1 Administrative career paths	142
6.2 Administrative career paths with entrance and exit moves	150
9.1 Blau and Duncan's 17 categories (<i>American Occupational Structure</i>)	213
9.2 Fifty-two usable "atoms" of occupation, industry, and employment status	215
9.3 Behavioral equivalence categories "EQ17"	218
9.4 Behavioral equivalence categories "EQ21"	219
9.5 Behavioral equivalence categories "EQ19"	221
10.1 The relationship of contradictory class positions to class forces in capitalist society	226
10.2 Basic classes and dual class locations	235
11.1 Hypotheses of the social resources theory	following 268
11.2 Three differentials and the relative significance of the tie effect	following 268
13.1 Career-line outflow display: elementary school teachers	318
13.2 Example of the information produced about the job title CKPC (production and control clerks) by the Career Line Identification Program	331
13.3 Key to diagrams displaying job shifts on career lines	333
13.4 Career-line paths among specific and generic job titles in a small manufacturing firm, for positions equal to and above the level of foreman	334

Maps

9.1 Map of 52 "atoms" (best two-dimensional fit)	216
9.2 Map 9.1 with overlays to show occupational groupings	217

Tables

2.1 Letters to a member of the Committee on Committees, 88th–89th Congresses	34
2.2 Committee transfers, 1961–1971	37
2.3 Number of Democratic requests, 1961–1967	39
2.4 Democratic requests, 1961–1967	41
2.5 Committee replacements within delegations, 1961–1971	44
2.6 χ^2 representational balance	46
2.7 Democratic mobility within delegations, 1961–1967	51
2.8 Relative performance of self-selection and delegation control explanations	52
3.1 Variability in the use of search methods	68
3.2 Plant size and the use of search methods	69
3.3 Summary of statistical tests from polytomous logit model (X^2 statistics)	71
3.4 Parameter estimates from model including organizational, positional, and control variables	72
4.1 Binomial model	88
4.2 East, Midwest, other model	92
4.3 General vacancy model	95
5.1 1970–1971 Boston Area Survey profiles with earnings above the minimum wage and acceptable matches to Census occupational titles	115
5.2 Regressions of logs of profile ratings on profile characteristics in the Boston Area Survey	117
5.3 Intergenerational correlations for different measures of social standing among OCG-II fathers and sons with complete data	120
6.1 Summary of positions in administrative hierarchy	138
6.2 Corrected interposition mobility data	139
6.3 Standardized effect parameters for interadministrative position mobility	141
6.4 Standardized effect parameters for entrance and exit moves	149

7.1	Means and standard deviations for industry data	166
7.2	Accessions and separations	167
7.3	Restaurant analysis descriptive statistics	173
7.4	Number of full-time and part-time employees	174
7.5	Change in number of employees between seasons	176
8.1	Hypothetical mobility for NLS sample women, 1967-1977, for 3 by 3 sex-type mobility table, assuming 100% turnover	190
8.2	Mobility for NLS sample women, 1967-1977, for 3 by 3 sex-type mobility table	193
8.3	Mobility for CPS occupation changers, 1980-1981, for 3 by 3 sex-type mobility table	194
8.4	Sex-type correlations by measurement detail, 1980 by 1981, for CPS women and men occupation changers	196
8.5	Tests of partition of sex-type mobility tables for Breiger and Goodman models	197
8.6	Three-way log-linear models of sex-type mobility: tests of log-linear models including all two-way relationships	198
9.1	Goodness-of-fit indices by categorical model and by number of dimensions used for the LLD fit	214
10.1	Homogeneity of each category with each indicator deemed to reflect "basic" class locations	233
11.1	U.S. employed workers by gender, race, and occupational category	265
11.2	Occupant differentials by gender, race, and occupational category	266
13.1	Job categories used, methods of identifying career lines, and theoretical interpretations and assumptions of four career-line analyses	310
13.2	Demographic characteristics of job titles (specific and generic) and job shifts	338
13.3A	Log-linear Weibull regression estimates of the determinants of the log of job durations	346
13.3B	Log-linear Weibull regression estimates of the determinants of the log of job durations	347
