

Gender Relations in Canada

Intersectionality and Beyond

Janet Siltanen & Andrea Doucet

Today it is widely recognized that the experience of inequality depends on the intersections of gender, race, and class in each individual life. In *Gender Relations in Canada* Janet Siltanen and Andrea Doucet trace the way the implications of gender play out for women and men throughout the life course, from the formation of gender identity in childhood through the identity struggles of adolescence to adulthood, where gender continues to play a major role in the structure of work and family life alike. At the same time the authors underline the importance of moving beyond intersectionality as a framework for research in this area.

HIGHLIGHTS

- Personal reflections from a dozen graduate students in sociology, as well as the authors themselves, underline the connections between academic research and individual experience***
- A chapter contributed by Mary Ellen Donnan examines gender issues in the context of career, citizenship, and political life.**
- Each chapter includes objectives, research topics, and discussion questions, along with suggested readings, Elms, and websites.**
