<i>Preface</i>	xiii
1. Party Choice and Social Structure: Theory, the Party Choice Variable and Statistical Measures	1
1.1 Introduction: the study of the relationship between party choice and social structure	1
1.2 Review of comparative literature on social structure and party choice	4
1.3 Grouping of parties in party families	14
1.4 The party choice variable	19
1.5 Socialist/non-socialist party choice	31
1.6 Statistical measures and the analysis of changes over time	34
1.7 The plan for the book and the organisation of the empirical analyses	41
2. Religious Denomination	43
2.1 Introduction: the two faces of the religious cleavage	43
2.2 Religious denominations	46
2.3 Religious denomination and party choice	53
2.4 Socialist/non-socialist party choice	76
2.5 Conclusion	82
3. Church Religiosity and Church Attendance	86
3.1 Introduction: church religiosity in a comparative perspective	86
3.2 Church religiosity and party choice	97
3.3 Party choice and church attendance within the different religious denominations in religiously mixed countries	115
3.4 Socialist/non-socialist party choice	123
3.5 Conclusions	128

4. Urban-Rural Residence	132
4.1 Introduction: the urban-rural cleavage, or urban-rural contrasts	132
4.2 Operationalisation of urban-rural residence	134
4.3 Urban-rural residence and party choice	136
4.4 Socialist/non-socialist party choice	151
4.5 Conclusion	155
5. Education	159
5.1 Introduction	159
5.2 The education variable in the surveys and changes in education levels in a comparative perspective	163
5.3 Education and party choice	167
5.4 Socialist/non-socialist party choice	187
5.5 Conclusions	194
6. Gender	198
6.1 Introduction	198
6.2 Gender and party choice	201
6.3 Socialist/non-socialist party choice	217
6.4 Conclusion	222
7. Conclusion: the Decline, Convergence and Transformation of Cleavage Politics	224
7.1 Introduction	224
7.2 Social cleavages and nominal-level party choice	225
7.3 Overlap and crosscut for the various cleavages	240
7.4 Left-right division of parties	243
<i>Bibliography</i>	278
<i>Index</i>	283

List of Figures

2.1	Trends in the portion that do not consider themselves as members of a religious denomination	52
2.2	Strength of the correlation between religious denomination and party choice, 1970–97, measured by Cramer's V	54
2.3	Strength of the correlation between religious denomination and party choice, 1970–97, measured by Nagelkerke's R^2	54
2.4	Trends in the strength of the correlation between religious denomination and party choice measured by Cramer's V	59
2.5	Trends in the strength of the correlation between religious denomination and party choice measured by Nagelkerke's R^2	60
2.6A	The strength of the correlation between religious denomination and socialist/non-socialist party choice measured by the eta-coefficient, 1970–97. Green parties placed in the non-socialist group	77
2.6B	The strength of the correlation between religious denomination and socialist/non-socialist party choice measured by the eta-coefficient, 1970–97. Green parties placed in the socialist group	77
2.7A	Trends in the correlation between religious denomination and socialist/non-socialist party choice. Eta-coefficients. Green parties placed in the non-socialist party group	78
2.7B	Trends in the correlation between religious denomination and socialist/non-socialist party choice. Eta-coefficients. Green parties placed in the socialist party group	79
3.1	Development of church attendance in eight countries according to the PDI-index	93
3.2A	Trends in church attendance according to religious denomination in Britain. PDI-index	95
3.2B	Trends in church attendance according to religious denomination in Germany. PDI-index	95
3.2C	Trends in church attendance according to religious denomination in the Netherlands. PDI-index	96

3.3	The strength of the correlation between church attendance and party choice, 1970–97. Eta-coefficients	98
3.4	Trends in the strength of the correlation between church attendance and party choice measured by the eta-coefficient	102
3.5A	The strength of the correlation between church attendance and socialist/non-socialist party choice according to the lor-measure, 1970–97. Green parties placed in the non-socialist group	124
3.5B	The strength of the correlation between church attendance and socialist/non-socialist party choice, according to the lor-measure, 1970–97. Green parties placed in the socialist group	125
3.6A	Trends in the strength of the correlation between church attendance and socialist/non-socialist party choice according to the lor-measure. Green parties in the non-socialist group	126
3.6B	Trends in the strength of the correlation between church attendance and socialist/non-socialist party choice according to the lor-measure. Green parties placed in the socialist group	127
4.1	Strength of the correlation between urban/rural residence and party choice, 1970–97. Eta-coefficients	136
4.2	Trends in the strength of the correlation between urban/rural residence and party choice measured by the eta-coefficients	140
4.3A	Correlation between urban–rural residence and socialist/non-socialist party choice measured by the Lor-measure, 1970–97. Greens placed in the non-socialist party group	152
4.3B	Correlation between urban–rural residence and socialist/non-socialist party choice measured by the lor-measure, 1970–97. Greens placed in the socialist party group	152
4.4A	Trends in the strength of the correlation between urban–rural residence and socialist/non-socialist party choice according to the lor-measure. Greens in the non-socialist group	154
4.4B	Trends in the strength of the correlation between socialist/non-socialist party choice and urban–rural residence according to the lor-measure. Greens in the socialist group	154

5.1	Average education level in the population of the eight countries, 1973–97	164
5.2	Trends in average level of education in the eight countries	166
5.3	Average education level in different birth cohorts in the eight countries, 1973–97	167
5.4	Strength of the correlation between education and party choice measured by the eta-coefficient, 1973–97	168
5.5	Trends in the strength of the correlation between education and party choice measured by the eta-coefficient	172
5.6A	Correlation (lor-scores) between education and socialist/non-socialist party choice, 1973–97. Greens placed in the non-socialist group	188
5.6B	Correlation (lor-scores) between education and socialist/non-socialist party choice, 1973–97. Greens placed in the socialist group	188
5.7A	Trends in the strength of the correlation between education and socialist/non-socialist party choice measured by the lor-scores. Greens placed in the socialist party group	190
5.7B	Trends in the strength of the correlation between education and socialist/non-socialist party choice measured by the lor-scores. Greens placed in the non-socialist party group	191
6.1	Strength of the correlation between gender and party choice measured by the eta-coefficient, 1970–97	202
6.2A	Trends in the strength of the correlation between gender and party choice measured by the eta-coefficient	206
6.2B	Trends in the strength of the correlation between gender and party choice measured by the PDI-measure	206
6.3A	Trends in the strength of the correlation between gender and socialist/non-socialist party choice according to the PDI-measure. Green parties placed in the non-socialist party group	219
6.3B	Trends in the strength of the correlation between gender and socialist/non-socialist party choice according to the PDI-measure. Green parties placed in the socialist party group	219

7.1A–H	Trends in the strength of the various social cleavages according to the eta-coefficients	227
7.2	Trends in the impact of the religious cleavages on party choice measured by Nagelkerke's R^2	235
7.3	Trends in the controlled impact of the class variables (education and social class) on party choice measured by Nagelkerke's R^2	236
7.4	Trends in the impact of the total cleavage model on party choice measured by Nagelkerke's R^2	237
7.5A–H	Trends in the bivariate correlations between social cleavages and socialist/non-socialist party choice. Greens placed in the socialist party group. Lor-scores	244
7.6	Trends in the impact of the religious cleavages (controlled for gender and urban–rural residence) on left–right party choice. Greens placed in the leftist party group	251
7.7	Trends in the impact of the class variables (controlled) on left–right party choice. Greens placed in the leftist party group	252
7.8	Trends in the impact of the total cleavage model on left–right party choice. Greens placed in the leftist party group	255
7.9	Trends in the impact of the total cleavage model on left–right party choice. The best fitted model regarding the placement of the Greens	257

List of Tables

1.1	Comparative effect of social structure upon partisanship based on data from the 1960s	9
1.2	Grouping of political parties into nine party families	20
1.3	Support for political parties in the eight countries grouped into party families, 1970–97	24
1.4	Trends in support for the parties in the various countries	26
1.5	Trends in support for socialist, non-socialist and green parties in the various countries	33
1.6	Examples of how various statistical measures are presented and analysed	37
2.1	Trends in belongingness to various religious denominations	48
2.2	Overall differences in support for the various political parties, according to religious denomination in a comparative setting, 1970–97, with parties grouped into party families	56
2.3	Religious denomination and party choice, 1970–97	61
3.1	Frequency of church attendance in different time periods, 1970–97	89
3.2	Overall differences in support for the various political parties according to church attendance in a comparative setting, 1970–97. Parties are grouped into party families	99
3.3	Church religiosity and party choice, 1970–97	104
3.4	Church attendance and party choice according to religious denomination in religiously mixed countries, 1970–97	116
4.1	Overall differences in support for the various political parties according to urban–rural residence in a comparative setting, 1970–97. Parties are grouped into party families	137
4.2	Urban–rural residence and party choice, 1970–97	141
5.1	Age when finishing full-time education 1973–97	165
5.2	Overall differences in support for the various political parties according to education in a comparative setting, 1970–97. Parties are grouped into party families	169
5.3	Education and party choice, 1973–97	174

6.1	Overall differences in support for the various political parties according to gender in a comparative setting, 1970–97. Parties grouped into party families	203
6.2	Gender and party choice, 1970–97	208
7.1	Overlap and change in overlap for cleavage variables	241
