

Richard J. Gaylord Louis J. D'Andria

Simulating Society

A *Mathematica*® Toolkit for Modeling
Socioeconomic Behavior

Contents

Foreword by Scott E. Page *xi*

What This Book Is About *xv*

Introduction

Chapter 1: Modeling a Society of Mobile Heterogeneous Individuals *3*

- 1.1 Introduction *3*
- 1.2 Milling About *4*
- 1.3 Computer Simulation Projects *15*
- 1.4 References *16*
- 1.5 Programs in the Chapter *17*

Cultural Exchange

Chapter 2: Transmitting Culture *21*

- 2.1 Introduction *21*
- 2.2 The More Alike We Are, the More Alike We Become *21*
- 2.3 The Closer We Agree, the Closer Our Agreement Becomes *31*
- 2.4 Social Status and Role Models *35*
- 2.5 Computer Simulation Projects *39*
- 2.6 References *41*
- 2.7 Programs in the Chapter *42*

Socioeconomic Transactions

Chapter 3: Deciding Whether to Interact 49

- 3.1 Introduction 49
- 3.2 Fool Me Once, Shame on You; Fool Me Twice, Shame on Me 51
- 3.3 I Heard It Through the Grapevine 57
- 3.4 Signals 61
- 3.5 Computer Simulation Projects 67
- 3.6 References 70
- 3.7 Programs in the Chapter 71

Chapter 4: Choosing How to Behave 77

- 4.1 Introduction 77
- 4.2 Choosing One's Interaction Behavior with Another Individual
Based on the Behavioral History of the Other Individual 78
- 4.3 Aspirations 85
- 4.4 Computer Simulation Projects 91
- 4.5 References 98
- 4.6 Programs in the Chapter 99

Group Interactions

Chapter 5: Grouping and Conforming 105

- 5.1 Introduction 105
- 5.2 Forming Neighborhoods 105
- 5.3 Conforming 112
- 5.4 Social Norms, Fads, and Fashions 117
- 5.5 Computer Simulation Projects 117
- 5.6 References 122
- 5.7 Programs in the Chapter 123

Nonlocality

Chapter 6: Social Networking and Moving to Far-Flung Locations 129

- 6.1 Introduction 129
- 6.2 Reach Out and Touch Someone 130
- 6.3 Follow the Leader 135
- 6.4 Nonlocal Movement 139
- 6.5 Computer Simulation Projects 145
- 6.6 References 145
- 6.7 Programs in the Chapter 146

Appendices

Appendix A: How *Mathematica* Works 151

A.1 Expressions 151

A.2 Patterns 153

A.3 Functions 159

A.4 Evaluation 166

Appendix B: List and Matrix Essentials 169

B.1 List Manipulation 169

B.2 Matrix Manipulation 174

B.3 Higher Order Functions 182

Appendix C: Graphics and Efficiency 191

C.1 Graphics 191

C.2 Animations and Front End Programming 201

C.3 Simulations in Limited Memory 203

C.4 Programs in the Appendix 209

Index 215
