

Contents

Part I Plant Physiology

| | |
|--|-----------|
| 1 A Synthesis of Thermodynamics and Bioenergetics in Plant Physiology: The Investigation of a Moody Apprentice..... | 3 |
| The Gentleman Chooses Science..... | 7 |
| The Cycle of Life in European Science | 18 |
| 2 The Exchange of Matter and the Transformation of Energy | 23 |
| Famintsyn's Approach to the Cycle of Life..... | 23 |
| Physiological Debates on the Nature of Microorganisms..... | 26 |
| The Intellectual Context for Vinogradskii's 1883 Report..... | 32 |
| Vinogradskii's Style | 35 |

Part II Experiment and Natural History

| | |
|---|-----------|
| 3 The Laboratory is Nature: Investigating the Cycle of Life Under the Microscope | 39 |
| A Comfortable Internship: Anton de Bary's Laboratory at the University of Strassburg | 40 |
| A Brush with German Darwinism: Vinogradskii's Sulphur Spring Expeditions..... | 43 |
| Species Constancy: Vinogradskii's Physiological Interpretation of the Monomorphism-Pleiomorphism Debate | 48 |
| 4 Free Nature in the Laboratory | 59 |
| Beggiatoa Nutrition..... | 60 |
| Vinogradskii's Virtuosity: The Role of Sulphur in Beggiatoa Nutrition..... | 63 |
| A New Physiological Type..... | 67 |
| The Reception of Vinogradskii's Research..... | 69 |

| | | |
|----------|--|-----|
| 5 | Vinogradskii's Transformation from Plant Physiologist to Ecologist, 1890–1920 | 73 |
| | Autotrophism | 74 |
| | Nitrification as a Biological Phenomenon | 77 |
| | Soil Microbiology at the Imperial Institute of Experimental Medicine | 83 |
| 6 | Soil Science and Russian Ecology | 93 |
| | Vinogradskii's Contributions | 93 |
| | Physiological Ecology | 96 |
| | Beketov Without Darwin: Vinogradskii's Concept of the Cycle of Life | 99 |
| | Scientific Forestry: Vinogradskii Retires to Gorodok | 103 |

Part IV French Agriculture

| | | |
|----------|--|-----|
| 7 | The Master of Brie-Compte-Robert and His "Direct Method:" | |
| | Translating the Cycle of Life into Ecology | 107 |
| | Vinogradskii Comes to Brie-Comte-Robert: | |
| | The Resurrection of a Career | 108 |
| | The Direct Method in 1923: Its First Explication | 110 |
| | The Direct Method in 1925: The Rise of Soil Microbiology | 117 |
| 8 | Ecological Microbiology | 125 |
| | Ecological Microbiology in 1925 | 127 |
| | The Direct Method in the Late 1920s | 130 |
| | The Direct Method and Microflora in the Early 1930s | 134 |

Part V The Impact of Vinogradskii's Work

| | | |
|-----------|--|-----|
| 9 | Science is Ecological and Ecology is Scientific: | |
| | The Uptake of Vinogradskii's Direct Methods | 141 |
| | The "Cycle of Life" at the Rutgers Agricultural Experiment Station | 143 |
| | A "Holistic Habit of Mind" | 149 |
| | Statistical Soil Science: Rothamsted Agricultural Experiment Station | 152 |
| | In Beijerinck's Backyard: The Delft School of Microbiology | 156 |
| 10 | Vinogradskii's Reception in Russian and Soviet Microbiology | 161 |
| | Vinogradskii's First Student, V. L. Omelianskii: | |
| | Microbes as "Living Reactives" | 162 |

| | |
|---|-----|
| Nikolai Kholodnyi: Iron Bacteria Research and Vinogradskii's Direct Method | 167 |
| The Role of Microbes in Russian and Soviet Soil Science..... | 169 |
| Ecological Microbiology in the Soviet Union | 171 |
| 11 Conclusions | 173 |
| Bibliography | 179 |
| Index | 189 |
