

TABLE OF CONTENTS

EDITORIAL PREFACE	v
FOREWORD	xvii

AUTHORS' INTRODUCTION

GERNOT BÖHME, WOLFGANG VAN DEN DAELE, RAINER HOHLFELD, WOLFGANG KROHN AND WOLF SCHÄFER / Introduction	3
1. The Social Determinants of Knowledge	3
2. The Phases of Development in Scientific Disciplines	6
2.1. Explorative phase	6
2.2. Paradigmatic phase	7
2.3. Post-paradigmatic phase	8
3. Science for Society as a Perspective	9
Notes	10
Bibliography	11

PART I. CASE STUDIES

SUMMARY OF CONTRIBUTIONS	15
WOLFGANG KROHN AND WOLF SCHÄFER / Agricultural Chemistry. The Origin and Structure of a Finalized Science	17
1. Introduction	17
2. The Demographic Context of Agricultural Chemistry	19
3. The Pre-history of Agricultural Chemistry	22
4. The Paradigm of Agricultural Chemistry	32
4.1. Cycles of reproduction	32
4.2. The constructive variation of cycles	36
4.3. The progressive problemshift in agricultural chemistry	39

5. The Institutionalization of Agricultural Chemistry	43
6. Conclusion	46
Notes	47
Bibliography	50
 GERNOT BÖHME / Autonomization and Finalization: A Comparison of Fermentation Research and Fluid Mechanics	 53
1. Introduction	53
2. Fermentation Research — Fluid Mechanics: A Comparison of Two Theoretical Developments	54
2.1. Initial status and comparability	54
2.2. Historical overview	57
2.2.1. Fermentation research	57
2.2.2. Fluid mechanics	60
2.3. Analysis	64
2.3.1. Fermentation research	65
2.3.2. Fluid mechanics	71
3. Conclusion	83
Notes	86
Bibliography	88
 RAINER HOHLFELD / Cancer Research. A Study of Praxis-Related Theoretical Developments in Chemistry, the Biosciences and Medicine	 93
1. Introduction	93
2. The Development of Chemical and Biological Theories: Definitions and Assumptions	96
3. Cancer Approaches Based on Mature Theories	99
3.1. Classification of tumours in pathological anatomy	99
3.2. Chemical theories of carcinogenesis	100
3.3. The somatic mutation theory of tumour induction	101
3.4. The biochemical approach to cancer	103
3.5. Synopsis	105
4. Current Cancer Research in Cell and Developmental Biology	107
4.1. The molecular biology of higher cells	107
4.2. Experimental linkages between basic research in cell and developmental biology and cancer research	109
4.2.1. Tumour virology	110

4.2.2. Cell biology using systems of tumour cells	111
4.2.3. The system of blood-forming cells	112
4.2.4. A coincidence of tumour research and research into early developmental phases: the teratoma	113
4.3. Transfer research	113
4.4. Synopsis	114
5. Pure Empirical Cancer Research: Human Biology and Medicine	116
Notes	118
Bibliography	123

PART II. THEORETICAL CONSIDERATIONS

SUMMARY OF CONTRIBUTIONS	129
--------------------------	-----

GERNOT BÖHME, WOLFGANG VAN DEN DAELE AND RAINER HOHLFELD / Finalization Revisited	131
--	-----

I. Problems in the Philosophy of Science

1. Theoretical Maturity and Closed Theories	131
1.1. The phenomenon of the continuing validity of theories	131
1.2. The concept of closed theories	133
1.3. Systematic objections	135
1.4. Closed theories and the dynamics of theory	138
2. Fundamental Theories, Special Theories and the Problem of Applying theories	140
2.1. Theory-application as a problem in the philosophy of science	140
2.2. What does it mean to say 'A theory is valid for an object, but cannot be applied to it'?	141
2.3. Principles of application	143
3. Theoretical Maturity as the Basis for Goal-orientation	145
3.1. "Theoretical maturity" in the case studies	145
3.2. Criteria for assessing the maturity of theories	147

II. Science Policy Considerations

1. Finalization and Direction	149
-------------------------------	-----

1.1. Orientation of science in the explorative phase	151
1.2. Orientation of science in the paradigmatic phase	152
1.3. Orientation of science in the post-paradigmatic phase	153
2. Theoretical vs Empirical Strategies for the Solution of Problems	157
2.1. The technical potential of theory	157
2.2. Orientation toward goals and criticism of goals	159
3. The Social Integration of Science	161
3.1. Finalization and autonomy	161
3.2. Disciplinary communities and "task communities"	164
Notes	166
Bibliography	170
 GERNOT BÖHME, WOLFGANG VAN DEN DAELE AND WOLFGANG KROHN / The Scientification of Technology	 173
1. Introduction	173
2. The Unification of Science and Technology in the Renaissance	174
2.1. The emergence of the science-technology relationship	174
2.2. Early technical and natural sciences	176
2.3. The knowledge of possible nature — the knowledge of the nature of the possible	177
2.4. The historical evolution of the interrelation of technology and science	179
3. The Separate Development of Natural Science and Technology	180
4. The Orientation of Science Toward Technology	183
4.1. Technological developments internal to science	183
4.2. The technology-orientation in the theory of mechanics and in the mechanistic world image	186
4.3. Scientific supply to production	188
5. The orientation of technology toward science	189
6. Theoretical technology	194
Notes	199
Bibliography	203
 WOLF SCHÄFER / Normative Finalization	 207
1. Introduction	207
2. The Theoretical Basis of Research in Finalization	207

2.1. Basic hypotheses reconsidered	207
2.2. Normative claims revised	212
2.3. The notion of a normative finalized science	213
3. Retraction of Basic Hypotheses and Suppression of Normative Claims	216
3.1. Theoretical retraction of basic hypotheses	216
3.2. Political suppression of normative claims	217
4. The Social Reconstruction of Science	219
4.1. A utopian perspective for science	219
4.2. Two strategies for research	220
4.3. Toward a revolution in the social paradigm of science	221
Notes	226
Bibliography	229

PART III. PROSPECTS

SUMMARY OF CONTRIBUTIONS	235
WOLFGANG VAN DEN DAELE AND WOLFGANG KROHN / Science in a Crisis of Legitimation	237
1. Introduction	237
2. Theoretical and Practical Prerequisites for the Legitimation of Science	237
3. First Paradox of Utility: from Experimenting for Human Beings to Experimenting on Human Beings	239
4. Second Paradox of Utility: the Pursuit of Technology for Its Own Sake	242
5. Control of Research and Change in Values: Between Dogmatism and Scientism	244
6. Accountability for the Social Consequences of Science	246
7. Perspectives	247
Notes	249
Bibliography	250
GERNOT BÖHME AND WOLF SCHÄFER / Towards a Social Science of Nature	251
1. The Project of the Modern Age — Recalled for Reform	251

2. Critical Science Studies Moved Forward: from Science and Society to the Politics of Nature	251
3. Science, Politics, Nature: Traditional and Contemporary Relations	252
3.1. Science and politics	252
3.2. Science and nature	254
3.3. Politics and nature	255
4. Digression: Going Natural, Going Luddite, and Going Technocrat. Three Ways of Going Astray	257
5. The Triangle of Science, Politics, and Nature Established	259
6. Normative Concepts of Nature in Social Reality	260
7. Normative Concepts of Nature in the Social Sciences	263
8. Research Prospects	266
Notes	268
Bibliography	268

APPENDIX

INTRODUCTORY NOTE	273
WOLF SCHÄFER / The Finalization Debate: A Reply to our Critics. With a Bibliography of the Finalization Discussion and Debate	275
1. Introduction	275
2. The First Proscription: It is Forbidden to Study the Progressive Goal Orientation of Science	277
2.1. The humus theory of basic research — an anti-finalist position	277
2.2. The dissolution of the coincidence of the social and cognitive autonomy of basic research — a finalist hypothesis	281
3. The Second Proscription: It is Forbidden to Advocate the Emancipatory Partisanship of Scientists	286
4. The Third Proscription: It is Forbidden to Believe in the Evolutionary Convergence of Theoretical and Practical Discourse	288
4.1. The disjunction of theory and practice — an anti-finalist position	288

4.2. The convergence of theoretical and practical discourse — a finalist hypothesis	290
5. Conclusion	293
Notes and References	294
 BIBLIOGRAPHY OF THE FINALIZATION DISCUSSION AND DEBATE	 301
I. The anti-finalization campaign and debate in the media	301
II. Reviews of <i>Starnberger Studien 1</i>	303
III. Contributions to the academic finalization discussion and debate	303
 NOTES ON AUTHORS	 307
 INDEX OF NAMES	 309
