

The ninth edition of *Applying Cultural Anthropology: An Introductory Reader* is a collection of articles that provide compelling examples of applied research in cultural anthropology. In this age of globalization and increased cultural intolerance, the basic messages of public anthropology are more important than ever. This new edition offers ten new readings that refer to contemporary social issues such as religious belief, work and family, social class, food production, relationships, consumerism, the effects of climate change on culture, and globalization.

What instructors are saying:

"My students report that they really like the text. They like both the pieces themselves and the introductory summaries of the pieces. The book, designed as a reader, is much more accessible, enjoyable, [and] informative than a standard textbook."

Sarah Lamb, Brandeis University

"This text is designed to present the ways in which anthropologists are actively engaged in helping people to address the modern issues that stem from differences in the ways humans interact with the world."

Sarah Sportman, University of Connecticut

"This text provides both scholarly and popular articles about a variety of topics and cultures around the world that highlights the significance of anthropology in solving practical problems and understanding everyday life."

Rosann Bar, Caldwell College
