

Contents

List of Illustrations • *ix*
List of Tables • *x*
Preface • *xiii*

1

Historical Ecology:
A Multidimensional Ecological Orientation • 1
Carole L. Crumley

2

Concepts in Historical Ecology:
The View from Evolutionary Theory • 17
Bruce P. Winterhalder

3

Tracking and Testing the Nature/Culture Dichotomy in
Practice • 43
Alice E. Ingerson

4

Global Climate and Regional Biocultural
Diversity • 67
Joel D. Gunn

5

Historical Ecology and Landscape Transformation in
Eastern Equatorial Africa • 99
Peter R. Schmidt

6

Management for Extinction in Norse Greenland • 127
Thomas H. McGovern

7

Population Ecology and Civilization in Ancient
Egypt • 155
Fekri A. Hassan

8

The Ecology of Conquest:
Contrasting Agropastoral and Agricultural Societies'
Adaptation to Climatic Change • 183
Carole L. Crumley

9

The Role of Archaeology in Raising Environmental
Consciousness:
An Example from Southwest Florida • 203
William H. Marquardt

10

Toward a Properly Historical Ecology • 223
Thomas C. Patterson

Epilogue • 239
Carole L. Crumley

Santa Fe Accord • 243

References • 245
Index • 271

Illustrations

- 2.1. Domains of attraction for a system of two variables and two alternate stable states • 38
- 4.1. Cross-section of atmospheric structure • 73
- 4.2. Discharge response of Mechet Creek, Burgundy, France, to changes in global average temperature • 76
- 4.3. Discharge response of Candelaria River, Campeche, Mexico, to changes in global average temperature • 77
- 4.4. Winter precipitation in the Southern Plains and California • 78
- 4.5. Time-space model of adaptive information capture potential • 85
- 4.6. Climatic trajectory and cultural experience on the High Plains • 87
- 6.1. Comparison between pasture area and floor space for various uses in Norse Greenland • 132
- 6.2. Major taxa in the faunal assemblages in Norse Greenland • 135
- 6.3. Hypothetical Norse seasonal round • 136
- 6.4. Effect of variation in fodder supply on Norse farms • 142
- 6.5. Ability of Norse farms to be self-sufficient • 143
- 6.6. Reported seal catch, 1954–1975, Qaqortoq, Greenland • 147
- 6.7. Summary of medieval Greenland/Icelandic world view • 151
- 7.1. Population of Egypt from ancient to modern times • 171
- 8.1. Dominant climatic regimes of Europe • 191
- 8.2. Relative position of air masses, 1200–300 BC • 194
- 8.3. Relative position of air masses, ca. 300 BC–AD 300 • 194
- 8.4. Relative position of air masses, AD 500–900 • 195
- 8.5. Late Holocene range of the Temperate-Mediterranean ecotone • 195

Tables

- 4.1. Global-scale climatic episodes • 80
- 6.1. Comparison of floor space at sites in Norse Greenland • 133
- 7.1. Estimation of probable population of ancient Egypt • 165
- 7.2. Probable population of Greco-Roman Egypt, minimum subsistence levels • 166
- 7.3. Probable population of Greco-Roman Egypt, adequate subsistence levels • 167
- 7.4. Probable population of ancient Egypt • 169
- 7.5. Range of population estimates • 170
- 7.6. Low Nile River levels associated with high grain prices and famines • 173
