# List of Maps, Figures, Tables and Appendices

## *Maps*

1.1	Location of fieldwork in the South Indian state of Kerala	30
1.2	Cholanaickan territories ( $t_1$ - $t_{10}$ ) and the distribution of caves within these	33
2.1	Traditional Saami settlements and current Fennoscandian herding zone	63
2.2	Swedish reindeer-herding Samebys	66
2.3	Norwegian reindeer regions	79
2.4	The Finnish Paliskuntas	81
3.1	Present summer and winter pasture areas of the Bakkarwal in Jammu and Kashmir	96
3.2	The difference in the extent of the northern summer pastures used by the Bakkarwal c. 1947 and now	119
4.1	Map of Botswana, showing the location of Bushman groups mentioned in the text	139
6.1	Location of the Pygmy groups and rainfall	206
6.2	Distribution of hunting paths and camps of Mbuti Pygmies, Ituri forest	214
6.3	Aka territories	224
6.4	Major trails used by the Aka Pygmies in the Lobaye region (C.A.R.)	225
11.1	Location of fieldwork in the Persian Gulf	331
12.1	Ja'alan and the area of fieldwork	344

*Figures*

1.1	Social levels of resource extraction and distribution among the Cholanaickan	38
1.2	Movement of Cholanaickan women after marriage from their natal territories to those of their husbands	49
3.1	Processes leading to loss of pasture and thus ultimately to the impoverishment of the Bakkarwal	109
4.1	Territoriality and the threshold of abundance	142
5.1	Pastoral groups of the categories I-III represented by the long-term precipitation rates (obtaining in their pasture regions) and plotted along Lieth's algorithm	170
5.2	Pastoral groups of the categories IV-VI represented by the long-term precipitation rates (obtaining in their pasture regions) and plotted along Lieth's algorithm	170
5.3	Long-term annual rainfall averages obtaining in the regions used by the pastoral communities in the categories I-VI	172
5.4	The influence of low annual average temperature on the relationship between rainfall averages and annual plant production calculated according to Lieth's algorithm as shown in the text	174
6.1	Seasonal changes in the composition of a Mbuti camp	216
6.2	Model of Aka camp nucleus	220
6.3	Aka lineages and resources	221
6.4	Annual cycle of Aka groups around 1900	223
6.5	The Aka band around Kenga (Lobaye)	227
6.6	Aka socio-economic system	231
6.7	Number of visits among Aka Pygmies	234
6.8	Frequency of visits among Aka Pygmies	234
6.9	Distances between birthplaces of spouses	237
6.10	Distances between birthplace and residence (Ndele region)	237
6.11	Distances between birthplace and residence (Bagandou-Loko region)	238
6.12	Baka camp terminology	244

6.13	Comparison of rainfall: number of rainy days in the Baka region (Moloundou, Cameroon) and Aka region (Boukoko, C.A.R.)	245
7.1	The resources of peripatetic Roma: the objects and methods of defence and the contenders	266
8.1	Ten Roma locality-bases in north-eastern Italy	285
13.1	Annual migration pattern of the Argo Halab	368
14.1	Peripatetics' native model of nomadic populations in Pakistan	380

## *Tables*

1.1	Cholanaickan territorial divisions in two forest ranges and their population in 1979	34
1.2	Different vines of the family Dioscoreaceae eaten by the Cholanaickan	39
1.3	Wild animals caught and consumed by the Cholanaickan	41
1.4	Various forest produce collected by the Cholanaickan	45
3.1	Precipitation values in the summer and winter areas of the Bakkarwal in Jammu and Kashmir	93
6.1	Types of food resources in the rain forest	209
6.2	Lineal composition of Mbuti and Efe bands	212
6.3	Residence of adults in fifteen Aka camps	220
6.4	Causes and frequency of visits	235
6.5	Distances between spouses in Bagandou region	236
6.6	Place of birth of Aka Pygmies	236
6.7	Different levels of social organisation in relation to the spatial organisation (Aka Pygmies)	239
6.8	Comparison of Aka and Mbuti group-structure	248
6.9	The Pygmy-Villager system	250
7.1	The forms and consequences of territoriality among peripatetic Roma	271
7.2	Intra-ethnic relations of Gypsies in Poland	273

*Appendices*

3.1	Examples of Potential Conflict-Situations	124
5.1	Types of access to pastures classified according to type of social organisation and rainfall in pasture region	177
5.2	To show how in high altitude areas, such as the Himalayas of eastern Nepal, annual temperature averages (T) vary with altitude	189
