1	Regional Studies and Global Change	1
2	Regional-Global Change Linkages: Southern Africa	3
2.1	Introduction	3
2.2	The Changing Climate of the Region	5
2.2.1	Half a Million Years of Change	5
2.2.2	The Past Twenty Thousand Years	7
2.2.3	The Period 18 000 to 10 000 B.P.	9
2.2.4	The Middle to Late Holocene: 6 000 to 1 000 B.P.	10
2.2.5	The Past Thousand Years	12
2.2.6	The Present	13
2.2.7	Future Climates	16
2.3	Regional Transport of Air over Southern Africa	17
2.4	Trace Gas Fluxes from the Surface	18
2.4.1	Biogenic Production of Trace Gases	19
2.4.2	Biomass Burning Emissions	20
2.4.3	Atmospheric Aerosols	22
2.5	Recirculation of Trace Gases and Aerosols	25
2.5.1	Sulphur Deposition	27
2.5.2	Effects of Sulphur Aerosols	27
2.5.3	Regional Aerosol Mass Fluxes	28
2.6	Some Consequences of Aerosol Transport	28
2.6.1	Nutrient Deposition	28
2.6.2	Impact on Precipitation	29
2.6.3	Iron Fertilisation of the Central South Indian Ocean	29
2.7	The Oceans around Southern Africa and Global Change	31
2.7.1	The Agulhas Current System	32
2.7.2	The Benguela Upwelling System	35
2.7.3	The Southern Ocean and Southern African Climate	38
2.8	Change and the Hydrological Cycle	39
2.8.1	Vulnerability under Present Climatic Conditions	39
2.8.2	Hydrological Uncertainties and Climate Change	41
2.8.3	Added Complexity and the Human Dimension of Change	45
2.9	Terrestrial Ecosystems and Change	48
2.9.1	Land Use Changes	49
2.9.2	Changes in Ecosystem Composition and Distribution	50
2.9.3	Impacts on Ecosystem Function	51
2.9.4	The Effects of Pests and Diseases	52
2.10	Human Acceleration of Regional Change	52
2.10.1	Poverty and Rural Subsistence	53
2.10.2	Unravelling Human and Biophysical Causes of Change	55
2.10.3	Adaptation to Environmental Change	56
2.11	Commercial Farming, Forestry and Environmental Change	56
2.11.1	Urban Growth and Environmental Change	62

2.12	Conclusions	62
	Acknowledgements	64
	References	64
3	Global Change and Biogeochemical Cycles: the South Asia Region	75
3.1	Introduction	75
3.2	Changing Atmospheric Composition over South Asia	77
3.2.1	Greenhouse Gases	78
3.2.2	Biosphere-Atmosphere Interactions	78
3.2.3	Aerosols	79
3.2.4	Ozone Changes	81
3.2.5	Anthropogenic Links	81
3.2.6	Links between the Lower and Upper Atmosphere	82
3.3	The South Asian Monsoon	82
3.3.1	Palaeomonsoon Changes	83
3.3.2	Monsoon Changes during the Period of Meteorological Record	85
3.3.3	The South Asian Monsoon and Global Warming	86
3.3.4	Climate Sensitivity of the Monsoon	87
3.3.5	Weakening of ENSO-Monsoon Relationships	88
3.4	Extreme Climatic Events	88
3.4.1	Cyclonic Storms, Monsoon Depressions and Low Pressure Systems ..	88
3.5	The Oceans around South Asia	89
3.5.1	Carbon-Nitrogen Cycling in the Aquatic Systems	89
3.5.2	Carbon	90
3.5.3	Methane	91
3.5.4	Nitrogen	92
3.5.5	Consequences of Global Change in South Asian Seas	93
3.6	Agriculture and Global Change in the Region	94
3.6.1	Current Agricultural Conditions and Practices	94
3.6.2	The Future	96
3.7	Worrisome Trends in the Bread-Basket Region of South Asia	101
3.7.1	Water in the Indo-Gangetic Plain	101
3.8	Conclusions	103
	References	104
4	Regional-Global Interactions in East Asia	109
4.1	Introduction	109
4.1.1	Characteristics of the Region	109
4.1.2	Central Questions	110
4.1.3	Principal Findings	110
4.1.4	Driving Forces for Environmental Change	112
4.1.5	An Integrated Framework for Understanding Global Change	112
4.1.6	The Concept of a General Monsoon System	113
4.1.7	Conclusions	114
4.2	The Atmosphere, Climate Variability and Change	114
4.2.1	Climate Variability	114
4.2.2	ENSO Variability	114
4.2.3	Palaeomonsoons	115
4.2.4	Abrupt Climatic Changes	116
4.2.5	Past and Future Trends	118
4.2.6	Human Influences and Impacts	120
4.3	Land-Ocean Interactions	121
4.3.1	Oceanic Consequence of El Niño	121
4.3.2	Coastal Processes and Sea-Level Changes	122
4.3.3	River Discharge	123
4.3.4	Impact on Water Resources	124

4.3.5	Cycles of Carbon and Nutrients	125
4.3.6	Marine Biota Changes	126
4.3.7	Impact of Sea-Level Rise on the Coastal Zone	129
4.4	Terrestrial Ecosystems in East Asia	129
4.4.1	Natural Land Cover	130
4.4.2	Cropland Systems	133
4.4.3	Urban Expansion	136
4.4.4	Impacts of Climate Change	136
4.4.5	Potential Vulnerability to Climate Change	139
4.5	Land Use and Cover Changes, Human Interactions and Climate	140
4.6	Conclusions	145
