<i>List of illustrations</i>	viii
<i>Preface</i>	x
<i>List of abbreviations</i>	xiii
1 Introduction	1
1.1 Why did I write this book? How did the work on it start? Why now? To whom?	1
1.2 Why my keen interest in social and psychological aspects of computerization?	5
1.3 Research engagement over time and recognitions - class journey and techno journey	7
1.4 Summary	16
1.5 Summary of <i>Humans on the Net</i>	16
1.6 Network of Excellence	27
1.7 New insights in society and harvest time for research	28
2 Theoretical perspective on the psychosocial and organizational life environment and ICT	29
2.1 Theoretical model on computer technology and work life	30
2.2 The Convergence Model - theoretical models revisited	52
2.3 How do the theories presented relate to other theories on the information society?	58
2.4 Future research related to the models	61
3 Information and communication technology (ICT) - past, present and future	63
3.1 Computer technology and its development	63
3.2 ICT global key areas	64

4	ICT and humans - ongoing changes in working life	72
4.1	Introduction	72
4.2	Continuous changes occur in the design of organization, work and management in the Net era	73
4.3	Networking - psychosocial communication becomes a key issue	80
4.4	Stress - with ICT our tempo is increasing	83
4.5	Allocation issues - knowledge transfer - global villages	84
4.6	Research	89
4.7	Concluding remarks	93
5	Home of the future and ICT - integration of professional and private roles	95
5.1	Introduction	95
5.2	Background and purpose	96
5.3	Problems	97
5.4	Methods	98
5.5	Hypotheses	98
5.6	Human needs and behaviour	101
5.7	Convergence between human needs and technology applications	102
5.8	Social trends	106
5.9	Our private role	111
5.10	Summary: home of the future - south-east Asia	116
5.11	Home of the future and ICT - Japan	117
5.12	Summary and conclusions	126
6	ICT and humans - ongoing changes in communities	130
6.1	Introduction	130
6.2	The project 'Computers in the Bakery'	132
6.3	Purpose and problems	135
6.4	Results from action research and the village eight years later - some snapshots	136
6.5	Comments and discussion	140
6.6	Community informatics in progress	142
6.7	Experiences from the national and international levels - new openings for rural areas and for communities	143
6.8	Comments and discussions	151

7	ICT and psychosocial communication	152
7.1	Introduction	152
7.2	Organizational design and management (ODAM) - the communication circle	157
7.3	Psychosocial communication during microcomputerization	159
7.4	Psychosocial communication during the use of applied AI and knowledge-based systems	160
7.5	Psychosocial communication in the Net era	161
7.6	Towards sustainability - action strategies for collaboration in distributed environments	168
7.7	Sustainability and communication/collaboration in the ICT society	170
8	ICT and stress	172
8.1	What is stress?	172
8.2	Stress and the 'paper office'	179
8.3	Stress and the batch-processing environment	180
8.4	Stress and display terminals	182
8.5	Stress in the Net era	189
8.6	Stress and health (and ICT)	193
8.7	Conclusions	194
9	From theory to actions: how to achieve the good ICT society - a tree of action	197
9.1	The national level	199
9.2	The individual level: its importance	204
9.3	The psychosocial work environment: requirements and preferences	205
9.4	Action at the corporate level	208
9.5	Roles	208
9.6	Actions regarding stress	213
9.7	Towards an information society for all	217
9.8	From an information society for all to quality of life for all	226
9.9	Concluding remarks	233
	<i>Appendices</i>	237
