# A SECOND CIVIL WAR ON AMERICAN SOIL?

Globally renowned expert on terrorism, extremism, and insurgency Malcolm Nance argues that a Trump-led guerilla war in this country is entirely possible. Through evidence-based assessment of events and activities, he uncovers the insurgency that started well before the insurrectionists' attack on the U.S. Capitol and continues today.

Nance predicted the first steps of an American fracture months before the January 6, 2021, insurrection. In *They Want to Kill Americans*, Nance shows that the post-2020 election urge to return to a place of “normalcy”—to forget—is the worst response we can have. To varying degrees, the seventy-four million people who put Trump in power continue to express hostility toward American democracy. American militiamen, terrorists, and radicalized political activists are *already* armed in mass numbers, and they regularly go unnoticed in the media, principally because Trump's most loyal and violent foot soldiers benefit from the ultimate privilege: being white.

*They Want to Kill Americans* is the first detailed look into the heart of the active Trump-led insurgency, setting the stage for a nationwide rebellion on American soil. This is a chilling and deeply researched early warning from a counterterrorism intelligence professional: America is primed for a possible explosive wave of terrorist attacks and armed confrontations that aim to bring about a Donald Trump-led dictatorship.
