Preface	1
1 Introduction	3
1.1 Objective	3
1.2 Aim of research	4
2 Methods	7
2.1 Approach	7
2.2 Field methods	8
2.2.1 Excavation	8
2.2.2 Geoelectric prospection	8
2.2.3 Geomagnetic prospection	8
2.2.4 Survey	8
2.3 Analyses	9
2.3.1 Artifact analyses	9
2.3.2 Radiocarbon analyses and dating	9
2.3.3 Archaeobotany	9
2.3.4 Faunal remains	10
2.3.5 Physical Anthropology	10
2.3.6 Strontium analyses	10
3 The Archaic Period	11
3.1 History of research	11
3.2 Chronology	15
3.3 The Archaic Period	18
3.3.1 Economic developments in the Middle Archaic Period	19
3.3.2 The Late Archaic Period	22
3.3.3 Conclusion of the economic developments in the Archaic Period	23
3.3.4 The Archaic Period in the working area in the Río Grande basin	25
4 Environment	29
4.1 The landscape of Southern Peru	29
4.1.1 The topography of the working area	30

4.1.2 Current climatic conditions	32
4.1.3 The current ecological zones in the working area	38
4.2 Climatic Conditions in the Middle Holocene	44
4.2.1 General Trends	44
4.2.2 El Niño onset	47
4.2.3 Interim conclusion of the climatic conditions in the Central Andes	48
4.2.4 Paleoclimate in the working region	49
4.3 Tentative reconstruction of the paleolandscape of the working area	50
 5 The site of Pernil Alto	 55
5.1 Location	55
5.2 History of research	57
5.3 Excavation	60
5.3.1 Units	60
5.3.2 Progression of the excavations directed towards the Middle Archaic occupation	60
5.3.3 Near-site Prospection	64
5.3.4 Excavation Method and documentation	68
5.3.5 Sampling	69
5.3.6 Preservation conditions and erosion	70
5.3.7 Classes of features	70
 6 Dating and Chronology	 73
6.1 Stratigraphy and Layers	73
6.2 Harris diagram	77
6.3 Problems in the generation of the Harris diagram	78
6.4 Period separation of the Harris diagram	78
6.5 Modelled radiocarbon chronology	79
6.6 Rectification of the stratigraphy using the modelled radiocarbon dates	86
 7 Structures	 89
 8 Burials	 123
 9 Artifacts	 159
9.1 Lithic artifacts	159
9.1.1 Lithic raw material	160
9.1.2 Flakes and flake tools	161
9.1.3 Cobbles and cobble tools	166
9.1.4 Cores and core tools	179

9.2 Bone artifacts	182
9.2.1 Raw material	182
9.2.2 Braiding tools	182
9.2.3 Pendants	185
9.2.4 Spatulas	185
9.2.5 Awl	185
9.2.6 Spear thrower head	185
9.2.7 Figurine	186
9.2.8 Undetermined bone artifact	186
9.3 Wooden artifacts	186
9.3.1 Trimmed woods	187
9.3.2 Pointed woods	187
9.3.3 Split woods	189
9.3.4 Scantlings	191
9.3.5 Tied up woods	192
9.3.6 Carved wood	192
9.4 Jewelry	192
9.4.1 Beads	193
9.4.2 Pendants	195
9.4.3 Bracelets and necklaces	197
9.4.4 Feather decoration	197
9.5 Basketry	197
9.5.1 Raw material	198
9.5.2 Cords	199
9.5.3 Knotted textiles	203
9.5.4 Looped textiles	204
9.5.5 Plant fibers	205
9.5.6 Twined textiles	207
9.6 Other artifacts	212
9.6.1 Bottle gourd epicarps and vessels	212
9.6.2 Color remains	212
9.6.3 Quartz fragments	214
9.6.4 Headdress or coiffure	214
9.6.5 Fur cap	214
9.6.6 Spindle whorls	214
9.6.7 Natural sediment remains	215
9.7 Conclusion of the artifact spectrum	215
 10 Botanical Remains	 217
10.1 Analyses of the macro-remains	217
10.2 Food plant remains	218

10.2.1 Cultivated plants	220
10.2.2 Wild collected plants	231
10.3 Industrial plants	234
10.4 Pollen and phytolith remains from grinding tools	235
10.5 Pollen remains from intra site samples	239
 11 Faunal Remains	 243
11.1 Vertebrates remains	243
11.2 Invertebrates remains	248
 12 Further results	 251
12.1 Caries ratios	251
12.2 Strontium analyses	252
 13 Dwellings	 255
 14 Artifacts as indicators for activities	 265
14.1 Procedure	265
14.2 Data analysis	271
14.3 Results	274
14.4 Activities by phase	274
14.5 Conclusion of the activity analyses	278
 15 Structure of the Middle Archaic settlement	 279
15.1 Activity areas in the settlement	279
15.2 Settlement structure	280
15.3 Settlement development	283
 16 The society of Pernil Alto	 289
16.1 Burial rites	290
16.2 Social structure	300
16.3 The burial practices of Pernil Alto in the context of the Archaic Period	304
 17 Economy	 307
17.1 Characterization of animal use	307
17.2 Ratios of the food plant remains	309

17.3 The subsistence of Pernil Alto	313
17.3.1 Direct indicators for the diet at Pernil Alto	315
17.3.2 Indirect indicators of the diet	315
17.3.3 Indirect indicators of the economy from the site placement	318
17.3.4 Indirect indicators of social type	319
17.4 Cultivation at Pernil Alto	321
17.5 Final characterization of the economy at Pernil Alto	324
18 Mobility	325
18.1 Indicators for mobility and sedentariness	326
18.2 Mobility or sedentism at Pernil Alto?	329
18.2.1 Indicators for sedentism	329
18.2.2 Indicators for mobility	331
18.2.3 Not assignable indicators	331
18.2.4 Conclusion of the state of mobility or sedentism	331
19 Connections between Pernil Alto and other environmental zones	333
20 Comments on the settlement on the middle Rio Grande section during the Middle Archaic Period	335
21 Summary and Conclusion	339
21.1 Efficacy of the applied methods and procedures	339
21.2 The Middle Archaic Settlement of Pernil Alto	341
21.3 The economy of Pernil Alto	342
21.4 Mobility at Pernil Alto	343
21.5 The society of Pernil Alto	344
21.6 The village of Pernil Alto	345
21.7 Pernil Alto in the context of the Rio Grande basin	347
21.8 The importance of the climate for the developments at Pernil Alto	347
21.9 Possible explanation for the developments at Pernil Alto	349
21.10 Pernil Alto in the perspective of the emergence of civilizations in the Central Andes	350
21.11 Future research possibilities	352
22 Kurzzusammenfassung	353
23 Brief summary	355

24 Resumen.....	357
Literature.....	359
Digital supplements	383
