| Introduction | 1 |
| HOWARD PHILLIPS AND DAVID KILLINGRAY | |
| PART I | |
| Virological and pathological perspectives | 27 |
| 1 A virologist's perspective on the 1918–19 pandemic | 29 |
| EDWIN D. KILBOURNE | |
| 2 Genetic characterisation of the 1918 'Spanish' influenza virus | 39 |
| JEFFERY K. TAUBENBERGER | |
| PART II | |
| Contemporary medical and nursing perspectives | 47 |
| 3 The plague that was not allowed to happen: German medicine and the influenza epidemic of 1918–19 in Baden | 49 |
| WILFRIED WITTE | |
| 4 'You can't do anything for influenza': doctors, nurses and the power of gender during the influenza pandemic in the United States | 58 |
| NANCY K. BRISTOW | |

PART III

Official responses to the pandemic 71

- 5 Japan and New Zealand in the 1918 influenza pandemic: comparative perspectives on official responses and crisis management** 73

GEOFFREY W. RICE

- 6 Coping with the influenza pandemic: the Bombay experience** 86

MRIDULA RAMANNA

PART IV

The demographic impact 99

- 7 Spanish influenza in China, 1918–20: a preliminary probe** 101

WATARU IIJIMA

- 8 Flu downunder: a demographic and geographic analysis of the 1919 epidemic in Sydney, Australia** 110

KEVIN MCCrackEN AND PETER CURSON

- 9 The overshadowed killer: influenza in Britain in 1918–19** 132

N.P.A.S. JOHNSON

- 10 Death in winter: Spanish flu in the Canadian subarctic** 156

D. ANN HERRING AND LISA SATTENSPIEL

- 11 Spanish influenza seen from Spain** 173

BEATRIZ ECHEVERRI

- 12 A holocaust in a holocaust: the Great War and the 1918 'Spanish' influenza epidemic in France** 191

PATRICK ZYLBERMAN

- 13 Long-term effects of the 1918 'Spanish' influenza epidemic on sex differentials of mortality in the USA: exploratory findings from historical data** 202

ANDREW NOYMER AND MICHEL GARENNE

PART V

Long-term consequences and memories 219

- 14 'A fierce hunger': tracing impacts of the 1918–19 influenza epidemic in southwest Tanzania** 221

JAMES G. ELLISON

- 15 'The dog that did not bark': memory and the 1918 influenza epidemic in Senegal** 230

MYRON ECHENBERG

PART VI

Epidemiological lessons of the pandemic 239

- 16 Transmission of, and protection against, influenza: epidemiologic observations beginning with the 1918 pandemic and their implications** 241

STEPHEN C. SCHOENBAUM

Notes 252

Bibliography 301

COMPILED BY JÜRGEN MÜLLER

Index 353

Illustrations

Figures

| | | |
|------|---|-----|
| 2.1 | Death rates in the United States by month, 1911–17 and 1918 | 40 |
| 2.2 | Influenza and pneumonia mortality by age, United States | 41 |
| 2.3 | Life expectancy in the United States, 1900–60 | 41 |
| 5.1 | Cartoon satirizing anti-influenza measures | 77 |
| 5.2 | 'By means of inoculation, the God of the Flu has nowhere to stay.' Japanese illustration of inoculation of children | 78 |
| 5.3 | 'Don't cough without covering your mouth. Flu is passed on like this!' Japanese illustration | 79 |
| 8.1 | The arrival of 'Spanish' flu in Sydney, January 1919 | 113 |
| 8.2 | Hospital admissions and deaths from influenza, Sydney, 1919 | 114 |
| 8.3 | Proclamation of N.S.W. Government regulations to control the epidemic | 117 |
| 8.4 | Age-specific death rates from influenza, Sydney, 1919 | 122 |
| 8.5 | Age-sex standardised influenza mortality ratios, Sydney, 1919 | 128 |
| 9.1 | Long-term influenza mortality in England and Wales | 133 |
| 9.2 | Influenza deaths in England, Scotland and Wales | 134 |
| 9.3 | Percentage of all female deaths by specific causes in England and Wales | 138 |
| 9.4 | Age distribution of influenza mortality in England and Wales, 1918–19 | 139 |
| 9.5 | Age distribution of influenza mortality in Scotland, 1918–19 | 140 |
| 9.6 | Vital statistics, England and Wales, 1900–30 | 143 |
| 9.7 | Influenza mortality in selected cities in England, 1918–19 | 147 |
| 10.1 | Interior of a Hudson's Bay Company Store, believed to be Norway House, c.1907–10 | 160 |
| 10.2 | Proportion of travel by season, Norway House, 1919 and 1920. | 165 |

| | | |
|------|--|-----|
| 10.3 | Per cent travel by month, Norway House, 1918–19 and 1919–20 | 165 |
| 10.4 | Simulations of the effects of summer and winter travel rates on peaking of cases of influenza at Oxford House and God's Lake | 166 |
| 10.5 | Simulations of equal and unequal within-community contact rates | 167 |
| 11.1 | Crude death and birth rates, Spain, 1901–40 | 174 |
| 11.2 | Epidemic diffusion of influenza through the railways in Spain | 176 |
| 11.3 | First epidemic wave in Spain | 178 |
| 11.4 | Second epidemic wave in Spain | 182 |
| 11.5 | Third epidemic wave in Spain | 182 |
| 11.6 | Cause-specific mortality from influenza in Spain, by age and sex, 1917 and 1918 | 186 |
| 12.1 | Precautionary measures against influenza advised in Nancy, France | 196 |
| 13.1 | Expectation of life ($e(0)$, in years) in relation to date, for males and females, United States, 1900–95 | 202 |
| 13.2 | Females' advantage over males in expectation of life and in ASDR, United States, 1900–95 | 203 |
| 13.3 | Male minus female ASDR, all causes and selected causes, United States, 1900–53 | 207 |
| 13.4 | Male minus female ASDR, all causes except violence, influenza and pneumonia; and selected causes, United States, 1900–53 | 208 |
| 13.5 | Male and female ASDR versus date, for tuberculosis, all forms, United States, 1900–60 | 211 |
| 13.6 | Male minus female ASDR, five causes (tuberculosis, all forms; chronic nephritis; heart disease; stroke; and gastritis), United States, 1908–28 | 213 |
| 16.1 | Prevalence of pre-epidemic antibodies to A/HK/68 (H3N2) at a Californian retirement community | 244 |
| 16.2 | Age-specific attack rates of influenza-like illness in two epidemics at a Californian retirement community | 245 |

Boxes

| | | |
|-----|--|----|
| 1.1 | Major influenza epidemics or pandemic threats since 1918 | 32 |
| 1.2 | What determinants of influenza virus pandemicity were operative in 1918? | 37 |

Tables

| | | |
|------|---|-----|
| 1.1 | Determinants of influenza virus pandemicity | 35 |
| 7.1 | Spanish influenza in China, 1918–20 | 104 |
| 7.2 | The number of deaths from influenza in Hong Kong, 1918–20 | 106 |
| 7.3 | Deaths from influenza in the towns and districts of Taiwan, 1916–25 | 107 |
| 7.4 | Influenza in Japan, Taiwan and Hong Kong, 1918–20 | 108 |
| 8.1 | Population size and mortality, Sydney, 1918–20 | 120 |
| 8.2 | Death rates from influenza per 1,000 males aged 15+, by occupational group, New South Wales, 1919 | 124 |
| 8.3 | Correlations (r) between 1919 standardised influenza mortality ratios and selected 1921 Census demographic and socio-economic indicators, Metropolitan Sydney | 130 |
| 9.1 | Recalculated influenza deaths (England and Wales) | 136 |
| 9.2 | Simple increase in mortality (England and Wales) | 136 |
| 9.3 | Recalculated influenza deaths (Scotland) | 137 |
| 10.1 | Distribution of deaths at Norway House by nuclear family, July 1918 to July 1919 | 169 |
| 10.2 | Norway House families with three to five deaths, July 1918 to July 1919 | 170 |
| 11.1 | Crude death and birth rates, Spain 1901–40 | 175 |
| 11.2 | Crude death rates and cause-specific mortality rates for influenza in Spain, 1918 | 177 |
| 11.3 | Epidemic excess mortality classified by cause during 1913–17 and 1918 | 184 |
| 11.4 | Cause-specific mortality from influenza in 1917 and 1918 | 185 |
| 11.5 | Mortality rates per age and sex of all causes, 1917–18 | 186 |
| 12.1 | Uncorrected death rates from flu per 1,000 population (1911) in Paris, according to age and sex, 30 June 1918–26 April 1919 | 198 |
