1. Introduction and research questions **11**

2. The position of social network analysis within the sociological research tradition **15**

2.1. Why networks? Theoretical perspectives of social network analysis *16*
2.1.1. Critique of atomized views and the argument for embeddedness 17
2.1.2. Relational embeddedness: dyadic relationships as the unit of analysis 18
2.13. Structural embeddedness, structural analysis of actions 19
2.1.4. Beyond structural determinism 21
2.2. Why quantitative representation? Methodical perspective of social network analysis *24*
2.2.1. Beyond individualistic methods 24
2.2.2. Representing social networks 26
2.2.3. Beyond static snapshots 30
2.3. Basic methodical concepts of social network analysis *31*
2.3.1. Individual actors in networks I: centrality and prestige 32
2.3.2. Individual actors in networks II: positions and roles 34
2.3.3. Sub-groups in networks 35
2.3.4. Affiliations and overlapping sub-groups 37
2.3.5. Structure of overall networks 38
2.3.6. Quantitative models for understanding mechanisms of social networks 40
2.4. Conclusion: Clarifying the relationship of individuals and social structure *42*

3. Localised knowledge spillovers: theoretical perspectives and critique **49**

5.7. *What are localised knowledge spillovers?* *50*
3.1.1. Definition of localised knowledge spillovers 50
3.1.2. Two general types of knowledge spillovers 51
3.1.3. Mechanisms of localised knowledge spillovers based on tacit knowledge? 52
3.2. Localised knowledge spillovers in the new economics of innovation/econometric approaches *53*
3.2.1. Knowledge production function 53
3.2.2. Patent citations 55
3.3. Localised knowledge spillovers in economic geography/territorial innovation models *56*
3.3.1. Localised knowledge spillovers and tacit knowledge 57
3.3.2. Local preconditions for localised knowledge spillovers 58
3.3.3. Unstructured local buzz 59
3.4. Critique of previous studies on localised knowledge spillovers *60*
3.4.1. Mediation by market mechanisms? Intentional knowledge flows? 61
3.4.2. Econometric approaches: no cogent evidence of localised knowledge spillovers .. 61
3.4.3. Territorial innovation models: problems of empirical evidence 65
3.4.4. Tacitness and localised knowledge spillovers form an odd couple 66

3.5. Conclusion: the need for deeper investigations of localised knowledge spillovers ... *68*

4. Knowledge, communities, space and scope for social network analysis ... **71**

4.1. Knowledge and knowing ... *71*
4.1.1. A variety of knowledge concepts ... 71
4.1.2. Knowledge as possession versus knowing as practice ... 72
4.2. Codified and unarticulated knowledge: a new knowledge topography ... *73*
4.2.1. Codified knowledge ... 75
4.2.2. Tackling tacit knowledge ... 75
4.2.3. Knowledge topography ... 76
4.3. Communities, networks and collectives: knowledge flows beyond islands of innovation? ... *78*
4.3.1. Communities of practice and epistemic communities ... 80
4.3.2. Epistemic collectives, networks of practice and networked individualism ... 81
4.3.3. Manifest knowledge practices versus latent opportunities in awareness spaces ... 82
4.3.4. Knowledge activities beyond firm boundaries and geographical boundaries? ... 84
4.4. Opening the black box localised knowledge spillovers ... *87*
4.4.1. The necessity for disentangling different mechanisms ... 87
4.4.2. Mechanisms of knowledge spillovers ... 89
4.4.3. Geographical proximity and localisation of knowledge spillovers ... 91
4.4.4. Scope for social network analysis ... 95

5. Some perspectives of social network analysis for analysing localised knowledge spillovers ... **97**

5.1. Case study I: networks of inventors ... *97*
5.1.1. Reconsidering the patent citation exercise ... 97
5.1.2. Social distance and mobility ... 99
5.1.3. Empirical results ... 101
5.1.4. Conclusion ... 104
5.2. Case study II: advise networks of technicians in industrial clusters ... *105*
5.2.1. Knowledge spillovers via informal advice flows among the technical personnel 106
5.2.2. Analysing network structural characteristics of the knowledge system ... 107
5.2.3. Conclusion ... 118
5.3. Interpreting social networks of knowledge workers ... *120*
5.3 A. Networks of inventors via patent data ... 120
5.3.2. Advice networks among knowledge workers ... 126
5.3.3. Conclusion ... 131
5.4. Limitations of social network analysis ... *131*
5.4.1. How can we get the data? ... 132
5.4.2. Mechanisms of knowledge spillovers out of sight? ... 133
5.4.3. Conclusion ... 135

6. Overall conclusion: what have we learnt? ... **137**

Tables and Figures ... **145**

Bibliography ... **147**
