<i>The road not taken</i>	xii
Introduction	1
1 The contemporary marketplace of ideas about language	6
The academic marketplace of ideas about language	6
The popular marketplace for ideas about language: Writing and sounding <i>correct</i>	13
The <i>right</i> language at home	18
Ebonics: Correctness, rightness, and the marketplace of ideas about language in action	21
2 Saussure	31
Saussure's marketplace of ideas about language	33
The aims of linguistics and linguistic structure	40
The alternative to linguistic structure	44
Foundations of the linguistics of speech	47
Linguistic features in speech and structure	53
Aggregation of evidence from speech	55
A different linguistics	58
Principles of the linguistics of speech	62
3 Evidence from linguistic survey research: basic description	64
Findings from the LAMSAS survey: Boundaries and plots	66
Findings from the LAMSAS survey: Lists and counts	82
4 Statistical evidence from linguistic survey research	104
Findings from the LAMSAS survey: Density estimation (DE)	113
Findings from the LAMSAS survey: Spatial autocorrelation	125
Findings from the LAMSAS survey: Social categories	130
5 Evidence from corpus linguistics	146
Firthian linguistics	148
Corpus linguistics	151

Text types	158
Sampling text	162
Sampling documents	166
Conclusions	172
6 Speech as a complex system	174
Complex systems	177
State cycles and simulations	180
Linguists and complexity	182
Speech as a complex system	184
Dimensionality	189
Zipf and non-linear distributions in speech	190
Scaling	198
Speech and chaos	209
Speech and evolution	211
7 Speech perception	218
Prototypes and schemas	220
Spatial perception	225
Evidence from perceptual dialectology	228
Perceptions of scaling	236
Perceptions of the non-linear distribution of speech	242
Perception and complex systems	247
8 Speech models and applications	251
Towards a formal model of speech	252
A less formal model	257
Relationship with the linguistics of linguistic structure	260
Speech and time	263
Speech and public policy	271
A last thought	277
<i>References</i>	278
<i>Index</i>	289

Figures

Figure 3.1	Kurath's dialect map	page 67
Figure 3.2	Telsur dialect map	68
Figure 3.3	Northern diagnostic isoglosses	70
Figure 3.4	Kurath's map of <i>dragonfly</i> variants	71
Figure 3.5	Northern isoglosses from Graddol, Leith, and Swann (1996: 271)	72
Figure 3.6	Pronunciations of the vowel in <i>cow</i>	73
Figure 3.7	Pronunciations of the vowel in <i>find</i>	74
Figure 3.8	<i>darning needle</i> variant for <i>dragonfly</i>	75
Figure 3.9	<i>dragonfly</i> variant for <i>dragonfly</i>	77
Figure 3.10	<i>mosquito hawk</i> variant for <i>dragonfly</i>	78
Figure 3.11	<i>skeeter hawk</i> variant for <i>dragonfly</i>	79
Figure 3.12	<i>snake feeder</i> variant for <i>dragonfly</i>	80
Figure 3.13	<i>snake doctor</i> variant for <i>dragonfly</i>	81
Figure 3.14	<i>front room</i> variant for <i>parlor</i>	82
Figure 3.15	<i>parlor</i> variant for <i>parlor</i>	83
Figure 3.16	<i>living room</i> variant for <i>parlor</i>	84
Figure 3.17	Pronunciations of <i>fog</i> containing [ɔ]	85
Figure 3.18	Pronunciations of <i>fog</i> containing [a]	86
Figure 3.19	<i>cloudburst</i> data (Table 3.1) charted by frequency of response	96
Figure 3.20	Adjusted <i>cloudburst</i> data (Table 3.2) charted by frequency of response	96
Figure 3.21	<i>fog</i> , plot of vowel 1a height (Table 3.3)	97
Figure 3.22	<i>thunderstorm</i> data, with chart by frequency	98
Figure 3.23	<i>mantel</i> data, with chart by frequency	99
Figure 3.24	<i>fifth</i> data, with chart by frequency (vowel 1a only)	100
Figure 3.25	<i>first</i> data, with chart by frequency (vowel 1a only)	101
Figure 3.26	<i>night</i> data, with chart by frequency (vowel 1a only)	102

Figure 4.1	Plot of <i>cloudburst</i> from the LAMSAS <i>cloudburst</i> item, ‘heavy rain’	114
Figure 4.2	DE plot of <i>cloudburst</i> from the LAMSAS <i>cloudburst</i> item, ‘heavy rain’	115
Figure 4.3	DE plot of <i>blinds</i> from the LAMSAS <i>blinds</i> item, ‘roller window coverings’	117
Figure 4.4	DE plot of <i>lightwood</i> from the LAMSAS <i>kindling</i> item	118
Figure 4.5	Unconstricted [r] in <i>Thursday</i> among LAMSAS speakers	119
Figure 4.6	Locations for 1162 speakers in LAMSAS	121
Figure 4.7	Kernel method DE plot for <i>pail</i> from the LAMSAS <i>pail/bucket</i> item (four probability levels)	122
Figure 4.8	Kernel method DE plot for <i>pail</i> from the LAMSAS <i>pail/bucket</i> item (two probability levels)	123
Figure 4.9	Nearest-neighbors method DE plot for <i>pail</i> from the LAMSAS <i>pail/bucket</i> item	124
Figure 4.10	Spatial autocorrelation (join-count) map for <i>gully</i> from the LAMSAS item for ‘washed out place in a field’	127
Figure 4.11	LAMSAS speaker locations, Maryland	135
