

Table of Contents

1	Preliminaries and Promises	1
	Defining Communication Behavior.....	3
	Residual Artifacts of Communication Behavior	4
	Outcomes of Communication Behavior.....	4
	Some Controversial Assertions	5
	Overview of the Book	6
	Moving On	10
2	Unitizing Communication Behavior.....	12
	A Small Taxonomy of Behavior	12
	No Units to be Found	13
	Definitions	14
	Types of Units	16
	Acts as Units	17
	Grammatical or Syntactic Units	18
	Thought Units	20
	Themes.....	23
	Time	25
	Codes as Unitizers	26
	Turns Versus Thoughts—A Comment	27
	Conclusion.....	28
3	Coding Communication Behavior.....	31
	Selecting or Creating a Coding System.....	31
	The Role of Theory	31
	Select or Create?	32
	Only If You Have To	33
	Other Considerations.....	37
	Some Practical Concerns.....	46
	Video Recording.....	46
	Transcribe and Check	47
	Conclusion	51
4	Observing and Recording Communication Behavior ..	54
	Conceptualizing the Target Behavior(s).....	54
	Variable of Interest	55
	Sample or Sign?.....	56
	How Many Behaviors?	56
	Pulling It Together.....	57

Dimensions and Measures of Communication	
Behavior.....	60
Frequency	61
Latency	63
Intensity	64
Pattern.....	70
Duration.....	73
Derived Ratios as Descriptive Indices.....	74
Time-Sampling	76
Continuous Observation	77
Intrasession Interval Sampling.....	79
Conclusion.....	85
5 Common Issues in Behavioral Observation.....	88
Observational Setting	88
The Coding Manual.....	90
Selection of Observers.....	92
A Word at the Start.....	93
Observer Training.....	94
Orientation Session	94
Stage 1. The Coding Manual.....	96
Stage 2. Coding Simple Examples	96
Stage 3. Code Realistic Examples.....	97
Stage 4. Practice in the Setting	97
Observer Monitoring.....	98
Sources of Bias in Observational Research	100
Observer Drift	101
Expectancy Effects	102
Reactivity.....	103
Observer Cheating	104
Reconciling Observer Discrepancies	105
Arbitrary Selection of Codes.....	106
Decision by Consensus.....	107
Employing Additional Observers	108
Conclusion	108
6 Reliability of Unitizing and Categorizing	111
An Overview of Classical Test Theory	112
True Scores and Error Scores	112
Parallel Tests	113

Split-Half Reliability	114
Reliability as Internal Consistency	116
Reliability of Observational Data.....	117
Conceptual Definition of Observational Reliability	117
Operational Definition of Observational Reliability	119
Unitizing Reliability	120
Components of Unitizing Reliability	121
Coefficients of Unitizing Reliability.....	121
Categorizing Reliability	124
How Reliable is Reliable Enough?	125
Scott's π	126
Cohen's κ	130
Extensions of κ	134
Category-by-Category Reliability	136
An Alternative Approach	139
A Troublesome Practice	141

7 Reliability for Quantitative Observational Data.....	145
Preliminary Decisions.....	146
Are the Observers a Random or a Fixed Facet?.....	146
Are the Data Matched or Unmatched?.....	147
Will the Final Data be a Single or a Composite Score?.....	148
Reliability as Consistency or Agreement?.....	148
Intraclass Correlation Coefficients	151
Reliability as Consistency	153
Reliability as Agreement.....	154
Generalizability Theory	158
Universe of Admissible Observations.....	160
G Versus D Studies.....	161
Crossed Versus Nested Facets	162
G Study Variance Components for a $p \times r$ Design	165
D Studies for a $p \times R$ Design	166
Error Variances	167
An Illustrative Example.....	170
Single Facet Nested Designs, $r : p$	171
Multifaceted G and D Studies.....	175
Conclusion	184

8	Validity	187
	History of the Study of Validation	188
	Before the Beginning	189
	All Validity Is Created Equal.....	189
	Validity of Inferences, Not Tests	191
	The Unitary Model of Validity	193
	Theory Versus Practice	194
	Taking Stock	196
	Validity as Argument.....	196
	Form of the Validity Argument.....	198
	The Interpretative Argument	199
	Toulmin's Model of Inference	201
	Validity Argument for Relational Control Coding	
	System.....	204
	A Better Approach	205
	What's Missing?	209
	Conclusion	212
9	Classic Analytic Procedures.....	215
	Markov Chain Analysis	216
	An Example of a Markov Chain.....	217
	Markov Chain Assumptions	219
	The Order Assumption	221
	The Stationarity Assumption.....	228
	The Homogeneity Assumption	233
	A Final Word on Markov Chain Analysis	239
	Lag Sequential Analysis	239
	Conducting the Analysis	241
	Next Steps.....	246
	Appendix 9.1 Test for First- Versus Second-Order	
	Markov Process	250
	Appendix 9.2 Test of the Stationarity Assumption	256
	Appendix 9.3 Test of Homogeneity Assumption	262

10	Log-Linear Models of Nominal Observational Data	268
	Hypotheses and Sampling	268
	Analyzing Two-Dimensional Tables	269
	Some Important Notation	270
	The Log-Linear Model	270
	The Likelihood Ratio Test Statistic	274
	The Hierarchy Principle	275
	Residual Analysis	276
	Analyzing Multidimensional Tables	279
	Complete Independence	280
	Two Variables Independent of a Third	280
	Conditional Independence	281
	Homogeneous Association	282
	Saturated Model	283
	An Example	283
	Log-Linear Models and Markov Chains	286
	The Order Assumption	286
	The Homogeneity Assumption	290
	The Stationarity Assumption	290
	Final Thoughts About Markov Chains	292
	Log-Linear Models and Lag Sequential Analysis	294
	So... What's Different?	295
	Wrapping Up	302
11	Linear Models of Categorical Data	304
	The GSK Procedure	305
	Defining the Response Functions	306
	Defining The Design Matrix	317
	Estimating and Testing the GSK Model	319
	Estimation	319
	Testing	319
	Research Examples	322
	Example 1: Ellis (1979)	322
	Example 2: Courtright et al. (1990)	328
	Example 3: Fairhurst et al. (1995)	331
	Conclusion	336

12	Analyzing Counts	339
	The Nature of Counts	339
	Distributions of Counted Data	341
	Binomial Distribution.....	341
	Negative Binomial Distribution.....	342
	Multinomial Distribution	344
	Poisson Distribution	345
	Logistic Regression—Dichotomous Response Categories...	346
	Odds and Odds Ratios	348
	The Logit	350
	Logistic Versus OLS Regression	351
	Logistic Regression—Multinomial Response Categories....	356
	Ordinal Responses	356
	Nominal Responses.....	358
	Poisson Regression.....	360
	Modeling the Offset	363
	The Dispersion Parameter	364
	Groupthink Example	365
	Some Remedies for Overdispersion	368
	Nonverbal Example—Underdispersion.....	372
	Conclusion	375
13	Hierarchical Generalized Linear Models	378
	A Brief Overview of Hierarchical Linear Modeling.....	380
	Hierarchical Generalized Linear Models (HGLMs)	383
	Remember the Link Function	383
	Centering.....	384
	Example Analyses	389
	Binomial HGLM	389
	Poisson HGLM.....	397
	Conclusion	415
14	Reversing the Sides of the = Sign	418
	Deconstructing the Transition Matrix.....	419
	The Disaggregation Approach.....	420
	Continuous Indices Approach.....	431
	A Brief Note About Transformations.....	437
	Conclusion	439
	References	443

Author Index	473
Subject Index	481
