<i>List of contributors</i>	<i>page vii</i>
<i>Foreword</i>	
<i>Roger S. Pulwarty</i>	<i>xi</i>
<i>Preface</i>	<i>xiii</i>
The significance of weather and climate extremes to society: an introduction	
<i>Henry F. Diaz and Richard J. Murnane</i>	<i>1</i>
1 Defining and modeling the nature of weather and climate extremes	9
1 Definition, diagnosis, and origin of extreme weather and climate events	
<i>David B. Stephenson</i>	<i>11</i>
2 Observed changes in the global distribution of daily temperature and precipitation extremes	
<i>David R. Easterling</i>	<i>24</i>
3 The spatial distribution of severe convective storms and an analysis of their secular changes	
<i>Harold E. Brooks and Nikolai Dotzek</i>	<i>35</i>
4 Regional storm climate and related marine hazards in the Northeast Atlantic	
<i>Hans von Storch and Ralf Weisse</i>	<i>54</i>
5 Extensive summer hot and cold extremes under current and possible future climatic conditions: Europe and North America	
<i>Alexander Gershunov and Hervé Douville</i>	<i>74</i>
6 Beyond mean climate change: what climate models tell us about future climate extremes	
<i>Claudia Tebaldi and Gerald A. Meehl</i>	<i>99</i>

7	Tropical cyclones and climate change: revisiting recent studies at GFDL <i>Thomas R. Knutson and Robert E. Tuleya</i>	120
II	Impacts of weather and climate extremes	145
8	Extreme climatic events and their impacts: examples from the Swiss Alps <i>Martin Beniston</i>	147
9	The impact of weather and climate extremes on coral growth <i>M. James C. Crabbe, Emma L. L. Walker, and David B. Stephenson</i>	165
10	Forecasting US insured hurricane losses <i>Thomas H. Jagger, James B. Elsner, and Mark A. Saunders</i>	189
11	Integrating hurricane loss models with climate models <i>Charles C. Watson, Jr., and Mark E. Johnson</i>	209
12	An exploration of trends in normalized weather-related catastrophe losses <i>Stuart Miller, Robert Muir-Wood, and Auguste Boissonnade</i>	225
13	An overview of the impact of climate change on the insurance industry <i>Andrew Dlugolecki</i>	248
14	Toward a comprehensive loss inventory of weather and climate hazards <i>Susan L. Cutter, Melanie Gall, and Christopher T. Emrich</i>	279
15	The catastrophe modeling response to Hurricane Katrina <i>Robert Muir-Wood and Patricia Grossi</i>	296
16	The Risk Prediction Initiative: a successful science–business partnership for analyzing natural hazard risk <i>Richard J. Murnane and Anthony Knap</i>	320
	<i>Index</i>	337
