Prologue	1
DUDLEY L. POSTON, JR AND CAROL S. WALTHER	
1 Fertility and population policy: an overview	8
QIUSHENG LIANG AND CHE-FU LEE	
PART I	
Family planning policy and contraceptive use	21
2 Patterns of induced abortion	23
JUAN WU AND CAROL S. WALTHER	
3 Patterns of sterilization	38
CAN LIU AND CHIUNG-FANG CHANG	
PART II	
Family and marriage patterns	51
4 The impact of family structure on fertility	53
FEINIAN CHEN	
5 The impact of intermarriage on the fertility of minority women	65
CHIUNG-FANG CHANG	

6 Emerging patterns of premarital conception

CAROL S. WALTHER

78

7 Changing patterns of desired fertility

LI ZHANG, XIAOTIAN FENG, AND QINGSONG ZHANG

89

PART III

Biological and social determinants of fertility

111

8 Age at menarche and the timing of the first birth

SHERRY L. MCKIBBEN

113

9 The effect of floating migration on fertility

XIUBONG YOU AND DUDLEY L. POSTON, JR

127

10 The impact of language dialect on fertility

XIAODONG WANG AND XIUHONG YOU

145

PART IV

Implications and the future

157

11 The managed fertility transition in rural China and implications for the future of China's population

CHE-FU LEE AND QIUSHENG LIANG

159

12 China's demographic destiny: marriage market implications for the twenty-first century

DUDLEY L. POSTON, JR AND KAREN S. GLOVER

172

Index

187

Figures

1.1	Total fertility rate (average number of children per woman) for urban and rural places and all China, 1949–1999	13
1.2	Crude rates of birth, death, and natural increase in China, 1949–2000	15
2.1	Probability of surviving the hazard of an abortion after the birth of the first child, stratified by rural and urban residence, China, 1997	29
3.1	Kaplan–Meier estimates of Chinese women surviving the hazard of sterilization, 1997	44
3.2	Kaplan–Meier estimates of Chinese women surviving the hazard of sterilization, by residence, 1997	45
4.1	Cumulative distribution of first birth by duration months since date of marriage, CHNS	57
4.2	Residential patterns of parents-in-law and parents of married women, CHNS, 1993	58
5.1	Comparison of the observed distribution of CEB, with the univariate Poisson distribution with mean of 2.82	70
8.1	Kaplan–Meier survival estimates for the hazard of a first birth: Chinese Han women, 1997	119
8.2	Kaplan–Meier survival estimates for the hazard of a first birth: Chinese minority women, 1997	119
9.1	Frequency distribution of CEB variable, and univariate Poisson distribution based on mean of 2.148	132
9.2	Generation of the migration status variable	134
11.1	Age-specific fertility rates by urban and rural places: all China	164
11.2	Age-specific fertility rates by urban and rural places: Hebei province	165
11.3	Population growth rates of China and India, 1950–2000	168
12.1	TFRs: China, 1950–2001	173
12.2	SRB: Mainland China and the United States, 1980–2001	176
12.3	Sex ratios by age: the United States, July 1, 1999	178
12.4	Males and females born in Mainland China, 1980–2001	179
12.5	Number of excess males at marriageable age of 22: Mainland China, 2000–2021	179

Tables

1.1	Population, birth, and death rates of China, 1949–2000	12
2.1	Descriptive data: 11,762 women with at least one child, China, 1997	30
2.2	Cox proportional hazards models for the hazard of having abortion for the pregnancy following a woman's first child, China, 1997	33
3.1	Descriptive data of 10,406 currently married women with at least one child, China, 1997	43
3.2	Hazard ratios of female sterilization in China, 1997	46
4.1	Descriptive statistics of selected sample characteristics ($N = 218$)	60
4.2	Woman month risk of first birth, 1989–1993, CHNS ($N = 12432$)	61
5.1	Descriptive data for ever-married women aged 15–49, by ten ethnic groups, China, 1990	71
5.2	Mean numbers of CEB for exogamous women and endogamous women, by ten ethnic groups, China, 1990	72
5.3	Reduced Poisson regression models predicting number of CEB: minority ever-married women, aged 15–49, China, 1990	73
5.4	Poisson regression models predicting number of CEB, by rural and urban, minority ever-married women, ages 15–49, China, 1990	75
6.1	Dependent and independent variables: means and standard deviations, China, 1997	83
6.2	Logits and odd ratios of Chinese women having a premarital conception, 1997	85
7.1	Patterns of the desired number of children in rural areas of China	94
7.2	Pattern of the desired number of children in urban areas of China	98
7.3	Patterns of the desired gender of children in rural areas of China	100
7.4	Patterns of the desired gender of the next child and the number of existing children in rural China	102

7.5	Patterns of the desired gender of children in urban areas of China	104
8.1	Descriptive statistics of Chinese Han women for the hazard of a first birth, 1997	118
8.2	Descriptive statistics of Chinese minority women for the hazard of a first birth, 1997	118
8.3	Cox Proportional Hazard analysis of the hazard of a first birth: ever-married Han females, China, 1997	122
8.4	Cox Proportional Hazard analysis of the hazard of a first birth: ever-married minority females, China, 1997	123
9.1	Social demographic variables by migration status: ever-married women in China, aged 15-49, 1990	131
9.2	Percentage distributions of education status, for nonmigrants and groups of migrants: ever-married Chinese women, aged 15-49, 1990	136
9.3	Poisson regressions of number of CEB: ever-married Chinese women, aged 15-49, 1990	137
9.4	Poisson regressions of number of CEB: ever-married Chinese women, aged 15-49, 1990 (rural nonmigrants and rural-to-urban floating migrants)	140
9.5	Poisson regressions of number of CEB: ever-married Chinese women, aged 15-49, 1990 (urban nonmigrants vs. rural-to-urban floating migrants and urban permanent migrants)	141
10.1	Chinese dialects and their major locations in China	149
10.2	Lu's quantified indices for selected cities and the dialects groups	149
10.3	The coding of Chinese dialects by province	150
10.4	Descriptive statistics of independent and dependent variables	151
10.5	Zero-order correlations of dependent and independent variables	152
10.6	Standardized regression coefficients of effects of independent variables on CBR	152
11.1	Crude rates of birth, death and natural increase for urban and rural China, selected years, 1957-1999	161
11.2	Development indices of China and India around the year 1950	167
