# Illustrations

## FIGURES

1. View of Yosemite Valley from Inspiration Point, circa 1859	56
2. View of a deserted Yosemite Indian village, circa 1873	75
3. Typical projectile points of the Yosemite region	85
4. Conical bark house in Yosemite Valley, circa 1880s	101
5. Bedrock mortars	108
6. Scatterplot and nonlinear regression of debitage and subsite frequency data	132
7. Diachronic trends in debitage and calibrated subsite frequency data as a percentage of maximum population	137
8. Diachronic trends in population growth rates per 50-year increment based on the debitage population proxy	138
9. Relationship between total fertility rate (TFR) and life expectancy at birth ( $e_0$ ) in historical and modern nonindustrial populations, including Yosemite Indians	145
10. Comparison of flaked stone tool assemblages from the hearth areas at Hol'-low and He-le'-jah	194
11. Serrate Desert Side-Notched projectile points from He-le'-jah	202
12. Subsite temporal components based on obsidian hydration dates	211
13. Comparison of fire-scar frequency and intermediate-age conifer-stand start dates	215

## MAPS

1. Russian and Spanish colonial interests in California circa 1815 in relation to Yosemite Valley	17
2. Cultural and natural locales of significance to Mariposa Battalion activities (1851-1852) in the Yosemite region	37
3. Native Californian ethnolinguistic areas	66
4. Location of obsidian quarry sources and primary trans-Sierra trade routes of the Yosemite region	88
5. Isopleth maps of faunal remains, beads, edge-modified flake tools, and projectile points at Hol'-low	195
6. Isopleth maps of faunal remains, beads, edge-modified flake tools, and projectile points at He-le'-jah	196
7. Ten case-study areas of interior native peoples with possible precontact infiltration of Old World fatal disease	223
8. Iroquoian case-study area	225
9. Mid-Atlantic Piedmont case-study area	232
10. Upper Creek, Choctaw, and Natchez case-study areas	240
11. Caddoan case-study area	255
12. Eastern Prairies case-study area	263
13. Middle Missouri case-study area	267
14. Southwest case-study area	276

# Tables

1. Chronological sequence for the Yosemite region	84
2. Frequency of flaked stone tool types at Hol'-low and He-le'-jah	184
3. Proportional representation of debitage by technological type and reduction stage at Hol'-low and He-le'-jah	185
4. <i>Frequency of use-wear on edge-modified flake (EMF) tools at Hol'-low and He-le'-jah</i>	187
5. Types of faunal remains recovered at Hol'-low and He-le'-jah	190
6. Proportional representation of obsidian source materials in debitage samples from Hol'-low and He-le'-jah	205
A-1. Proxy population data	302
